

INDEX

Note: Page numbers followed by the letter f refer to figures. Page numbers followed by the letter t refer to tables. Page numbers followed by the letter p refer to plates.

- ABCs of trauma management, 2072–2073
- Abdomen, injuries to, with pelvic fractures, 2256
- Abdominal muscles, external oblique, for iliopsoas transfer, 1336
- Abdominal reflex, 56
- assessment of, in scoliosis, 223, 223f
- Abduction. *See also under specific joint(s), e.g., Hip.*
- definition of, 27t
- Abduction contracture(s)
- metacarpal, in cerebral palsy, 1222f–1223f
- of hip, Ober's test for, 40, 41f
- Abductor hallucis brevis tendon, transfer to first metatarsal, for dorsal bunion, 1372–1373, 1379f, 1386f–1387f
- Abductor limp
- after varus femoral osteotomy, 697, 700f
- in avascular necrosis, 583
- Abductor pollicis brevis tendon, preservation of, for radial polydactyly, 426, 430f–431f
- Above-knee amputation, 1793–1794
- ischial-bearing, for osteosarcoma, 1982p–1991p
- prostheses for, 1806
- Above-knee orthosis, for poliomyelitis, 1326–1327
- Abscess(es)
- Brodie's, 155f
- cold, in tuberculous arthritis, 1832–1833, 1833f
- intraosseous, 1848, 1851f
- of psoas muscle, 1850f
- paravertebral, in tuberculous spondylitis, 1832–1833, 1833f
- Abuse. *See Child abuse.*
- Accessory bone(s), in foot, 895f
- Accessory navicular. *See Navicular, accessory.*
- Acetabular index, in developmental dysplasia of hip, 531, 532f, 533t
- Acetabular teardrop figure, in developmental dysplasia of hip, 531–532, 533f
- Acetabulum
- anatomy of, 519, 519f–520f
- augmentation of
- osteotomies for, 642–646, 644f–649f
- Chiari, 642, 644f, 646
- shelf procedures for, 645–649, 646f
- development of, in developmental dysplasia of hip, 520f, 520–522, 522f
- dysplasia of
- after treatment for developmental dysplasia of hip, 587–596, 619f
- and developmental dysplasia of hip, 517
- Acetabulum (*Continued*)
- fractures of, 2251–2271. *See also Pelvis, fractures of.*
- complications of, 2271
- treatment of, 2268–2271, 2270f–2272f
- with hip dislocation, 2276f
- growth of, 2251, 2252f
- ossification into labrum, after use of Pavlik harness, 537, 538f
- radiographic changes in, in Legg-Calvé-Perthes disease, 679
- repositioning of, pelvic osteotomies for, 596–632, 618t, 621f–633f, 622p–641p
- Ganz, 633, 642, 643f
- Pemberton, 596–597, 618, 620f, 622p–629p
- Steel, 632, 642f
- Tonnis, 632–633
- Acetaminophen, postoperative, 112
- Acetylcholine receptor antibody(ies), in myasthenia gravis, 1500
- Achard syndrome, vs. Beals' syndrome, 1595
- Achilles tendon
- anterior transposition of, for equinus deformity, in cerebral palsy, 1137
- contracture of, and pes planovalgus, 912
- dissection of, in correction of vertical talus, 968p–969p
- lengthening of
- for equinus deformity, in cerebral palsy, 1136–1137, 1137f–1139f, 1140p–1141p
- for pes cavus, 991, 995f
- for talipes equinovarus, 931–932, 937, 938f
- tenodesis of, to fibula, for valgus ankle deformity, 1268
- Achondroplasia, 1510–1519, 1511f–1519f
- and kyphosis, 346
- and postlaminectomy kyphosis, 340f
- angular deformities of lower extremities in, 1517, 1518f
- clinical features of, 1510–1512, 1511f–1512f
- craniocervical stenosis in, 1513–1514
- diagnosis of, prenatal, 1513
- differential diagnosis of, 1513
- genetic features of, 1510
- growth hormone for, 1517, 1519f
- leg lengthening for, 1517, 1519f
- pathophysiology of, 1510–1512
- radiographic features of, 1512–1513, 1512f–1513f
- short stature in, 1517, 1519, 1519f
- spinal stenosis in, 1516f, 1516–1517
- Achondroplasia (*Continued*)
- thoracolumbar kyphosis in, 1514f–1515f, 1514–1516
- vs. osteogenesis imperfecta, 1727–1728
- vs. pseudoachondroplasia, 1524t
- Achterman and Kalamchi classification, of fibular deficiency, 1776, 1776f
- ACL. *See Anterior cruciate ligament (ACL).*
- Acrocephalosyndactyly syndrome(s), 1615
- anesthesia in, 120t
- Acromioclavicular joint
- dislocation of, 2118, 2120
- injuries to, Rockwood classification of, 2115, 2117f
- physeal fractures of, 2116f
- Acromion process, partial excision of, in shoulder disarticulation, 2016p–2017p
- Acro-osteolysis, in pyknodysostosis, 1564
- Acrosyndactyly, 434
- in congenital band syndrome, 461–462, 463f
- Actinomycosis, 1870, 1870f
- Active hypertrophy exercise(s), for poliomyelitis, during chronic phase, 1325–1326
- Acute hematogenous osteomyelitis. *See Osteomyelitis, acute hematogenous.*
- Acute infective polyneuritis, 1313t
- Acute lymphocytic leukemia, back pain in, 104–105
- Acute normovolemic hemodilution, 117
- Adamantinoma, vs. Campanacci's disease, 1917
- Adams' forward bending test
- in Scheuermann's kyphosis, 324, 328f
- in scoliosis, 217, 217f, 222
- ADD (attention deficit disorder), and Legg-Calvé-Perthes disease, 663–664
- Adduction, definition of, 27t
- Adduction contracture(s), of hip, in cerebral palsy, surgical treatment of, 1173, 1178–1179, 1179f, 1180p–1183p, 1184, 1185f
- Adductor hallucis brevis tendon, transfer to first metatarsal, for dorsal bunion, 1372–1373, 1379f, 1386f–1387f
- Adductor longus tendon, tenotomy of, for closed reduction of hip, 542p–543p
- Adductus longus muscle, dissection of, in open reduction of hip, medial approach to, 550–553
- ADI. *See Atlanto-dens interval (ADI).*
- Adiposogenital syndrome, 715
- Adolescence, growth spurt during, 1048, 1050f
- AER (apical ectodermal ridge), and limb development, 379, 1745, 1746f

- AERMF (apical ectodermal ridge maintenance factor), and syndactyly, 433
- AFO(s). *See* Ankle-foot-orthoses (AFOs).
- AFP (alpha-fetoprotein), screening for, 1250
- Age
 and back pain, 96
 and height, 10, 13f–18f
 for boys, 10, 13f, 15f, 17f
 for girls, 10, 14f, 16f, 18f
 and interpretation of radiographs, 127
 and joint range of motion, 28–29
 of hip, 37–38, 38t
 and mobility of cervical spine, 34t
 and postlaminectomy kyphosis, 339
 and signal intensity in magnetic resonance imaging, 154f, 154–155, 156f
 and weight, 10, 14f–18f
 for boys, 10, 13f, 15f, 17f
 for girls, 10, 14f, 16f, 18f
 gestational, and incidence of cerebral palsy, 1123
- Airway, management of, in trauma, 2070
- Aitken classification, of femoral deficiency, 1756, 1758, 1758f–1759f
- Akin procedure, for hallux valgus, 1018
- Aldolase, in muscular dystrophy, 1466
- Alglucerase, for Gaucher's disease, 1645
- Aliasing, on magnetic resonance imaging, 155
- Alkaline phosphatase (ALP), serum, in osteosarcoma, 1959
- Allergic reaction(s), to latex, 117–118
 in myelomeningocele, 1261
- Allis technique, of closed reduction in hip dislocation, 2275, 2278f, 2280f
- Allograft(s)
 for scoliosis surgery, 240–241
 vs. prostheses, for limb salvage
 after Ewing's sarcoma treatment, 2030f–2031f
 after osteosarcoma treatment, 2028–2029, 2029f
- ALP (alkaline phosphatase), serum, in osteosarcoma, 1959
- Alpha-fetoprotein (AFP), screening for, 1250
- ALS (amyotrophic lateral sclerosis), anesthesia in, 120t
- Ambidexterity, in toddlers, 21
- AMBRI, in shoulder instability, 2131
- Ambulation
 after bone graft epiphysiodesis, 736
 in cerebral palsy, prognosis for, 1130
 in Duchenne muscular dystrophy, lower limb surgery and, 1469–1470, 1470t, 1471f, 1472p–1475p
 in hip spica cast, after femoral shaft fracture repair, 2314, 2315f
 in myelomeningocele, 1253, 1255
 level of lesion and, 1256–1257
 in osteogenesis imperfecta, 1730
 in proximal focal femoral deficiency, 1761, 1761f
 with prosthesis, problems during, 1803
- Amelia, 1748, 1749t
 upper, bilateral, 1757f
- American Society of Anesthesiologists, physical status classification of, 111, 111t
- American Spinal Injury Association (ASIA), evaluation form of, 2103, 2104f
- Amnion disruption sequence, and transverse upper limb deficiencies, 1784, 1785f–1786f, 1786–1787
- Amniotic band syndrome. *See* Congenital band syndrome.
- Amputation
 above-knee, 1793–1794
 ischial-bearing, for osteosarcoma, 1982p–1991p
 prostheses for, 1806
 below-knee, 1794, 1795f
 for osteochondroma, 1996p–1999p
 prostheses for, 1806
 bony overgrowth after, 1791–1792, 1791f–1792f, 1796
 complications of, 1796, 1798, 1798f
 congenital band syndrome and, 461, 463f
 congenital tibial pseudarthrosis and, 881
 for fibular hemimelia, 1777–1779
 vs. limb lengthening, 1772–1777
 for macrodactyly, 458, 460f
 forequarter, Littlewood technique of, 2000p–2013p
 malignant tumors and, 1792
 prosthesis fitting after, 1805
 midhigh, for osteosarcoma, 1982p–1991p
 of foot, with knee arthrodesis, for femoral deficiency, 1762f, 1762–1763, 1766p–1767p
 of upper limb, 1793
 psychosocial issues in, 1796
 purpura fulminans and, 1792–1793, 1793f, 1796, 1796f
 through arm, 2018p–2021p
 traumatic, 1790–1792, 1790f–1793f, 1791t
 debridement of, 1791
 Ertl procedure in, 1792, 1793f
 in-field care of, 1791
 mechanism of, 1790, 1790f
 prognosis in, 1791, 1791t
 replantation after, 503–504
- Amyloidosis, in rheumatoid arthritis, 1819
- Amyoplasia. *See* Arthrogryposis.
- Amyotonia congenita, anesthesia in, 120t
- Amyotrophic lateral sclerosis (ALS), anesthesia in, 120t
- Analgesia. *See also* Pain management.
 patient-controlled. *See* Patient-controlled analgesia (PCA).
 regional, 114–115
 systemic, 112–114, 113t–114t
 with sedation, 111, 111t
- Analgia, congenital, 1448, 1449t
- Anatomic axis
 in femur, 1103, 1106f
 vs. mechanical axis, in lower extremities, 2322f
- Anatomic snuff-box, swelling of, in scaphoid fractures, 2246, 2247f
- Anderson-Green-Messner chart(s), for predicting remaining femoral/tibial growth, 1048–1051, 1049t, 1050f–1055f, 1052t
- Anencephaly. *See* Myelomeningocele.
- Anesthesia
 and malignant hyperthermia, 118
 asthma and, 110
 for closed reduction of ankle fractures, 2395
 in acrocephalosyndactyly syndromes, 120t
 in muscular dystrophy, Emery-Dreifuss, 1479
 in osteogenesis imperfecta, 124t, 1733
 in surgical procedures for cerebral palsy, 1134
 local, side effects of, 115–116
 NPO requirements and, 110, 110t
 orthopaedic syndromes affecting, 120t–125t
 physical status classification for, 111, 111t
 preoperative evaluation for, 109–111, 110t
- Anesthesia (*Continued*)
 regional, intravenous, 115–116
 upper respiratory infection and, 110
- Anesthetic(s), local, choice of, 115
- Aneuploidy, gonosomal, anesthesia in, 122t
- Aneurysm(s), of upper extremities, 497
- Aneurysmal bone cyst(s). *See* Bone cyst(s), aneurysmal.
- Angio-osteohypertrophy, anesthesia in, 122t
- Angled thumb, 449
- Angular deformity(ies), 25–26, 26f
 of leg, 1103–1117, 1104f–1116f, 1105t. *See also* Leg, angular deformities of.
- Anhidrosis, familial sensory neuropathy with, and insensitivity to pain, 1449t, 1453
- Animal bite wound(s), 478
- Anisomelia, and leg length inequality, 1039
- Ankle
 accessory ossification centers in, 2394–2395, 2399f
 anatomy of, 2391–2392, 2392f
 arthrodesis of
 in poliomyelitis, 1373–1395, 1388f–1389f, 1390p–1393p, 1394f
 distraction-compression, 1395, 1400p–1405p
 extra-articular subtalar, 1388, 1396p–1399p
 triple, 1383–1387, 1388–1389, 1390p–1393p
 pantalar, with ankle fusion, 1388–1389, 1394–1395
 disarticulation of, congenital tibial pseudarthrosis and, 881
 dorsiflexion of, 43, 43f
 and gait, 77, 78f
 equinovarus deformity of
 from unopposed activity of triceps surae and tibialis posterior muscles, in poliomyelitis, 1365, 1372f, 1374p–1377p
 in cerebral palsy. *See* Cerebral palsy, foot and ankle in, equinovarus deformity of.
 equinus deformity of, in Duchenne muscular dystrophy, 1467
 eversion of, 44, 44f
 fractures of, 2392–2414, 2393f–2417f
 axial compression, 2394
 classification of, 2392–2394, 2393f–2397f
 complications of, 2403–2414, 2404f–2417f
 delayed/nonunion as, 2405
 premature physal closure as, 2403–2405, 2404f, 2406f
 valgus deformity as, 2405, 2407f
 diagnosis of, 2394–2395, 2398f–2399f
 pronation-eversion-lateral rotation, 2393–2394, 2396f–2397f
 supination-inversion, 2393, 2393f–2394f
 treatment of, 2400–2401, 2401f–2403f
 supination-plantar flexion, 2393, 2394f–2395f
 treatment of, 2397, 2400f
 Tillaux, 2405–2410, 2407f–2410f
 closed reduction of, 2405, 2407
 mechanism of, 2405, 2407f
 open reduction of, 2407, 2409f–2410f
 prognosis in, 2407, 2410
 radiographic features of, 2405, 2408f
 treatment of, 2395–2403, 2400f–2403f
 anesthesia in, 2395
 operative, indications for, 2396

- Ankle (*Continued*)
- Salter-Harris type I and II distal fibular, 2396–2397
 - Salter-Harris type I tibial, 2397
 - Salter-Harris type II tibial, 2397–2398, 2400f–2401f
 - Salter-Harris type III distal tibial, 2399–2400, 2402f
 - Salter-Harris type IV distal tibial, 2401–2402, 2402f–2403f
 - Salter-Harris type V distal tibial, 2401–2403
 - triplane, 2410–2414, 2410f–2417f
 - closed reduction of, 2411–2412
 - mechanism of, 2410–2411, 2410f–2411f
 - open reduction of, 2412, 2414, 2415f–2417f
 - prognosis in, 2414
 - radiographic features of, 2411, 2412f–2414f
 - in cerebral palsy. *See* Cerebral palsy, foot and ankle in.
 - in myelomeningocele, 1262–1269. *See also* Myelomeningocele, foot and ankle in.
 - in poliomyelitis. *See* Poliomyelitis, foot and ankle in.
 - inversion of, 44, 44f
 - kinematics of
 - in cerebral palsy, 1128, 1128f
 - in sagittal plane, 79f
 - kinetics of, during gait, 80f, 81
 - motion of, limitation of, bone blocks for, 1395
 - plantar flexion of, 43, 43f
 - and gait, 77, 78f
 - push-off power of, in cerebral palsy, 1129, 1129f
 - range of motion of, 43–44, 43f–45f
 - stability of
 - assessment of, before triple arthrodesis, 1378
 - operative procedures for, history of, 1388t
 - syndesmosis of, 2391, 2392f
 - transfixation of, avoidance of, in treatment of congenital tibial pseudarthrosis, 877, 877f
 - valgus deformity of
 - after fractures, 2405, 2407f
 - after intramedullary rod fixation, for congenital tibial pseudarthrosis, 876, 876f
 - from congenital fibular pseudarthrosis, 884, 885f–886f, 887
 - hemiepiphysiodesis in, 1113f, 1268
 - in cerebral palsy, 1153, 1158
 - in hereditary multiple exostosis, varus closing wedge osteotomy for, 1924, 1925f
 - in myelomeningocele, 1265, 1268f, 1269, 1270p–1271p
 - varus deformity of, after fractures, 2405, 2406f
- Ankle clonus, 56
- Ankle fusion, Chuinard, for triceps surae muscle paralysis, 1372
- Ankle-foot orthoses (AFOs)
- for cerebral palsy, 1131–1132, 1132f–1133f
 - for leg length inequality, 1058, 1061f
 - for myelomeningocele patient, 1292, 1293f
 - ground-reaction, for myelomeningocele, 1292, 1293f
- Ankylosing spondylitis, 1821–1822, 1822f

 benign, of upper extremities, 503
 common anatomic sites of, 1896, 1896t
 limping from, 93
 malignant, 1955–2046
- Bone turnover, in osteogenesis imperfecta, 1722
- Boston brace, for scoliosis, idiopathic, 230, 231f
 adolescent, 230, 231f
 infantile, 277
- Botulinum toxin
 for cerebral palsy, in upper extremity, 1209
 for spasticity, in cerebral palsy, 1133–1134
- Boutonniere deformity, of proximal interphalangeal joint, treatment of, 476
- Bowlegs. *See Genu varum.*
- Boyd technique, for reduction of Monteggia fractures, 2221, 2222f
- Brace(s)
 Atlanta Scottish Rite, for Legg-Calvé-Perthes disease, 696, 698f
 Birmingham, for Legg-Calvé-Perthes disease, 696, 696f
 for congenital scoliosis, 287
 for developmental dysplasia of hip, in young child, 537–538, 538f
 for idiopathic juvenile osteoporosis, 1717
 for idiopathic scoliosis, 229–232, 230f–233f
 compliance with, 232
 contraindications to, 229
 effectiveness of, 229
 hours of wear and, 231
 indications for, 229
 protocols for, 231–232, 233f
 types of, 229–231, 230f–231f, 233f
 for Marfan's syndrome, 305
 for osteogenesis imperfecta, 1730
 Milwaukee. *See Milwaukee brace.*
 Newington, for Legg-Calvé-Perthes disease, 696, 697f
 pattern-bottom, for Legg-Calvé-Perthes disease, 658f
 prophylactic, after laminectomy, 310, 312
 Tachdjian, for Legg-Calvé-Perthes disease, 696, 697f
 Toronto, for Legg-Calvé-Perthes disease, 695f, 695–696
- Braces, Boston, for scoliosis, idiopathic, 230, 231f
 adolescent, 230, 231f
 infantile, 277
- Brachial artery
 dissection of, in disarticulation of elbow, 2022p–2023p
 injury to, from supracondylar humeral fractures, 2148f, 2162, 2163f, 2163–2165
- Brachial plexus, dissection of, in forequarter amputation, 2010p–2011p
- Brachial plexus palsy, obstetrical, 110p–117p, 118f, 479–487, 482f–486f
 classification of, 480
 clinical features of, 480
 differential diagnosis of, 480–481
 etiology of, 479–480
 incidence of, 479
 initial treatment of, 481
 later treatment of, 481
 natural history of, 480
- Brachial plexus palsy (*Continued*)
 prognosis in, 480
 with residual deformities
 of elbow, 481
 management of, 486–487, 498p–501p
 of forearm, management of, 486–487, 498p–501p
 of hand, 483–484
 management of, 487
 of shoulder, 481, 482f–483f, 483t
 management of, 484–486, 488p–495p, 496f–497f
 of wrist, 481, 483, 484f
- Brachydactyly, in pseudohypoparathyroidism, 1703f, 1704
- Brachytherapy, for soft tissue sarcoma, 2045, 2045f
- Bracing
 for myelomeningocele, 1291. *See also Myelomeningocele, management of, orthoses in.*
 for scoliosis
 in cerebral palsy, 1225
 in Duchenne muscular dystrophy, 1471
 in myelomeningocele, 1281
 prophylactic, in congenital tibial pseudarthrosis, 868–869, 870f–872f
- Brain
 disorders of, 1121–1245. *See also under specific disorder, e.g., Cerebral palsy.*
 levels affected by, 1121, 1122t
 pathology of, in myelomeningocele, 1253, 1254f
- Breast(s)
 development of, in females, 19, 19f
 shielding of, during radiography, 137
- Breast cancer, radiation and, 224
- Breech presentation, and developmental dysplasia of hip, 515, 515f
- Brodie's abscess, 155f
- Brooks technique, for atlantoaxial arthrodesis, 187f
- Brooks-Seddon pectoralis major muscle transfer, in poliomyelitis, 1418, 1420p–1423p
- Broomstick plasters, for Legg-Calvé-Perthes disease, 656, 659f
- Brown procedure
 for hip stabilization, in proximal focal femoral deficiency, 1770, 1772f
 for tibial deficiency, 1780–1782
- Brucellar osteomyelitis, 1869
- Bryant's traction
 for developmental dysplasia of hip, 540f
 for femoral shaft fractures, 2307, 2307f
- Bucholz-Ogden classification system, for avascular necrosis, 582–583, 582f–586f
- Buck-Gramcko "stiletto flap," for fingertip reconstruction, in syndactyly, 441, 441f
- Buckle fracture(s), 2059–2060, 2060f–2061f
 of distal forearm, treatment of, 2237, 2238f
 of immature skeleton, 2059–2060, 2060f–2061f
 of olecranon, 2202f
 of radius, 2060f–2061f
- Buddy strap(s), for finger splints, 392, 392f
- Bulbocavernosus reflex, 2103
- Bunion(s). *See Hallux valgus.*
 dorsal. *See Dorsal bunion.*
- Bunnell sternocleidomastoid muscle transfer, in poliomyelitis, 1418–1419, 1424f
- Bupivacaine, epidural administration of, 114–115

- Burn injury, of hand, 400, 401f
- Burst fracture(s)
of cervical spine, 2096–2097
treatment of, 2105–2106
- Buschke-Ollendorff syndrome, 1555
- Butler procedure, for varus fifth toe, 1024, 1028f–1029f
- Butterfly vertebra(e), in myelomeningocele, 1289f
- Bypass bone graft, for congenital tibial pseudarthrosis, 869, 871f, 873
- C1–2 transarticular screw fixation, for atlantoaxial rotatory displacement, 191, 192f
- “Cable cast,” for talipes equinovarus, 937
- Cadence parameter(s), 75–76, 76f
- Café-au-lait spots
in fibrous dysplasia, 1911
in neurofibromatosis, 1625, 1626f
- Caffey’s disease, 1561–1565, 1562f–1563f, 1564t
clinical features of, 1562
diagnosis of, 1564
differential diagnosis of, 1564, 1564t
genetic features of, 1562
orthopaedic management of, 1565
pathology of, 1562, 1562f
prognosis in, 1565
radiographic features of, 1563f, 1564
treatment of, 1564
vs. hypervitaminosis A, 1566t
vs. progressive diaphyseal dysplasia, 1556
- Calcaneal apophysis, accessory, in Larsen’s syndrome, 1604, 1606f
- Calcaneal neck, osteotomy of, with bone graft, for pes planovalgus, 915, 917f
- Calcaneal osteotomy
for equinovarus deformity, in cerebral palsy, 1146
for pes cavovarus, in Charcot-Marie-Tooth disease, 1441f–1442f
for pes cavus, 995, 999, 1000p–1001p, 1002f–1003f
for pes valgus, in cerebral palsy, 1153
for talipes equinovarus, with residual deformity, 948, 950, 950f
for valgus overcorrection, 943, 944f
sliding, for pes planovalgus, 916, 919f–920f
- Calcaneocavus deformity, of foot, from triceps surae muscle paralysis, 1365, 1378f
- Calcaneocuboid capsulotomy, for talipes equinovarus, 940, 951f
- Calcaneocuboid joint, release of, for talipes equinovarus, 935–936, 937f
- Calcaneofibular release, for talipes equinovarus, 937, 938f
- Calcaneonavicular coalition, 978f–980f
limping from, 92, 92f
treatment of, 980–981
- Calcaneovalgus deformity, vs. vertical talus, 961
- Calcaneus
abnormalities of, in talipes equinovarus, 923–924, 924f–925f
anatomy of, 2423, 2423f
cyst in, 1902f
fractures of, 2423f–2424f, 2423–2425
classification of, 2423–2424, 2424f
complications of, 2425
diagnosis of, 2424–2425
mechanism of, 2423
treatment of, 2425
- Calcaneus (*Continued*)
lengthening of, for pes valgus, in cerebral palsy, 1152–1153, 1160p–1163p, 1164f
skeletal fixation of, for limb lengthening, 1079, 1079f
transfer of tibialis anterior tendon to, 1264–1265, 1266p–1267p
- Calcaneus deformity
from Achilles tendon lengthening, for cerebral palsy, 1138, 1142f
from congenital posteromedial tibial bowing, 883, 883f
in myelomeningocele, 1264–1265, 1265f, 1266p–1267p
in poliomyelitis, operative procedure for, 1365–1373, 1373f, 1379f, 1380p–1385p, 1386f–1387f
- Calcaneus gait, after talipes equinovarus surgery, muscle transfers for, 946, 947f
- Calcification
epiphyseal, in chondrodysplasia punctata, 1545f, 1546
of knee, in dermatomyositis/polymyositis, 1494, 1494f
of muscle, in myositis ossificans, 1497, 1497f
of soft tissue, in hypervitaminosis D, 1704, 1705f
- Calcium
deposition of, failure of, in rickets, 1686, 1686f
metabolism of, 1685, 1686f
- Calf
atrophy of, in pes cavus, 987, 989f
pseudohypertrophy of, in Becker muscular dystrophy, 1478, 1478f
- Callotasis, for limb lengthening, 1083–1086, 1084f–1085f
complications of, 1088, 1089f, 1090
- Callus(es)
hyperplastic, in osteogenesis imperfecta, 1726–1727, 1728f
plantar, in pes cavus, 985, 987f
- Calmodulin, in platelets, and scoliosis, 218
- Campanacci’s disease, 1914–1917, 1917f–1919f
clinical features of, 1915
differential diagnosis of, 1916–1917
etiology of, 1915
pathology of, 1915, 1917f
radiographic features of, 1916, 1918f–1919f
treatment of, 1917
- Camptomelic dwarfism, vs. osteogenesis imperfecta, 1728
- Camptomelic dysplasia, 1677–1679, 1678f
- Camurati-Engelmann disease, 1555f, 1555–1556
- Cannulated screw(s)
for fixation of slipped capital femoral epiphysis, unstable, 744
for slipped capital femoral epiphysis in situ open pinning of, 729–731, 730f
percutaneous fixation of, 724p–727p
- Cantilever technique, with spinal fusion, for Scheuermann’s kyphosis, 334, 335f
- Capital femoral epiphysis, slipped. *See* Slipped capital femoral epiphysis (SCFE).
- Capitellum
fractures of, 2205
osteochondritis dissecans of, 2207–2208, 2208f
- Capsulectomy, for surgical drainage of hip, 1856p–1857p
- Capsuloplasty
for correction of vertical talus, 972p–973p
in open reduction of hip, using anterolateral approach, 566p–567p
- Capsulotomy, in open reduction of hip, using anterolateral approach, 562p–565p
- Carbon monoxide, exposure to, and congenital spinal anomalies, 280–281
- Cardiac surgery, neonatal, and risk of cerebral palsy, 1123
- Cardiovascular disease
in Marfan’s syndrome, 1588, 1589t, 1590
in muscular dystrophy
Becker, 1478
Duchenne, 1469
- Carpal bone
accessory ossification centers of, in Larsen’s syndrome, 1604, 1606f
duplication of, in mirror hand, 425
growth of, delayed, in Legg-Calvé-Perthes disease, 661–662, 664f
- Carpal coalition, in Ellis-van Creveld syndrome, 1680, 1681f
- Carpal tunnel syndrome
macroductyly and, 454
with Hurler’s syndrome, 1575
- Carpectomy, proximal row, in arthrogryposis, 1655
- Carpenter’s syndrome, anesthesia in, 120t
- Carpotarsal osteolysis, 1572f
- Carpus, centralization of, for radial deficiency, 1787
- Carrying angle
of arm, 2165, 2167f
of elbow, 26, 26f
- Cartilage
abnormalities of, in diastrophic dysplasia, 1535
destruction of, in hemophilia, 1880
- Cartilage oligomeric matrix protein (COMP), and pseudoachondroplasia, 1523
- Cartilage-hair hypoplasia, McKusick type, 1549
- Cartilaginous cap, in solitary osteochondroma, 1917–1919
- Cassette(s), radiographic, 133
- Cast(s)
bivalved, after tendon transfer, for poliomyelitis, 1329
changing of, after treatment of talipes equinovarus, 941–942
for humeral fractures, supracondylar, nondisplaced, 2149
for idiopathic scoliosis, infantile, 277
for Scheuermann’s kyphosis, 329, 330f
Petrie, for Legg-Calvé-Perthes disease, 656, 659f, 695
spica. *See* Spica cast(s).
- Casting
after closed hip reduction, 546, 548f
after correction of vertical talus, 966–967
after open hip reduction, 548–549
using anterolateral approach, 566p
using medial approach, 558p–559p
for ankle fractures
Salter-Harris type I and II distal fibular, 2397
Salter-Harris type II distal tibial, 2397
for brachial plexus palsy, with shoulder deformity, 485
for closed hip reduction, 542p–543p
for distal physeal fractures, 2328, 2329f
for Köhler’s disease, 900
for patellar dislocation, 2352
for reduction of spondylolisthesis, 366, 367f
for talipes calcaneovalgus, 907
for talipes equinovarus, 927–928, 931–934
for tibial diaphyseal fractures, 2379

- Casting (*Continued*)
 for tibial spine fractures, 2355
 for vertical talus, 966
 of foot, and prevention of pressure sores, 1262, 1262f
 of radial and ulnar fractures, 2227, 2229f
 of supracondylar humeral fractures, 2156
 principles of, 2077, 2077f–2078f
- Cataract(s), in chondrodysplasia punctata, 1546
- Catheterization, clean intermittent, in myelomeningocele, 1258–1259
- Catterall classification, of Legg-Calvé-Perthes disease, 683–684, 686f
- Cauda equina, encroachment on, in low-grade spondylolisthesis, 361
- Caudal regression syndrome, 1305–1310, 1306f–1310f
 classification of, 1306, 1520f–1523f
 clinical features of, 1306–1310, 1310f
 pathology of, 1305–1306
 treatment of, 1310
- “Cauliflower ear,” in diastrophic dwarfism, 1535, 1536f
- Cavovarus deformity
 in lipomeningocele, 1302, 1303f
 in pes cavus, 985, 986f
- Cavus foot. *See* Pes cavus.
- Cellulitis, from puncture wounds, 1863
- Center post screw(s), for Texas Scottish Rite Hospital instrumentation, 246p–247p
- Center-edge angle, in developmental dysplasia of hip, 531, 532f
- Central core disease, anesthesia in, 120t
- Central nervous system (CNS), tumors of, and torticollis, 193, 193f
- Cerebellar level, neuromuscular disorders at, and motor function, 1121, 1122t
- Cerebral blood flow, induced hypotension and, 116
- Cerebral gigantism, anesthesia in, 125t
- Cerebral hypotonic diplegia, 1313t
- Cerebral palsy, 1122–1234
 ambulation in, prognosis for, 1130
 and fractures, 1230, 1232
 assessment of, 1124–1130, 1126f–1129f
 deep tendon reflexes in, 1126
 electromyography in, 1128–1129, 1129f
 gait analysis in, 1126f–1129f, 1126–1130
 history in, 1124
 motor milestones in, 1124–1125
 muscle tone in, 1126
 classification of, 1123–1124, 1124f–1125f
 definition of, 1122
 epidemiology of, 1122–1123
 etiology of, 1123
 fingers in, surgical procedures on, 1211, 1216p–1219p
 foot and ankle in, 1134–1158, 1135f–1147f, 1140p–1141p, 1148p–1149p, 1154p–1157p
 dorsal bunion of, 1158, 1166f
 equinovarus deformity of, 1142f–1147f, 1142–1150, 1148p–1149p
 calcaneal osteotomy for, 1146
 gait analysis in, 1142–1143, 1143f
 posterior tibialis tendon lengthening for, 1143, 1143f
 split anterior tibialis tendon transfer for, 1145–1146, 1148p–1149p
 split posterior tibialis tendon transfer for, 1143–1145, 1144f–1147f
 triple arthrodesis for, 1146–1147
- Cerebral palsy (*Continued*)
 equinus deformity of, 1134–1142, 1135f–1139f, 1140p–1141p
 Achilles tendon lengthening for, 1136–1137, 1137f–1139f, 1140p–1141p
 and midfoot break, 1136, 1136f
 anterior Achilles tendon transposition for, 1137
 assessment of, 1135–1136, 1135f–1136f
 hallux valgus of, 1158, 1166f
 pes valgus of, 1150f–1151f, 1150–1152, 1154p–1157p, 1158f, 1164f–1166f
 calcaneal lengthening for, 1152–1153, 1160p–1163p, 1164f
 calcaneal osteotomy for, 1153
 clinical features of, 1150, 1150f
 Grice extra-articular arthrodesis for, 1152, 1154p–1157p, 1158f
 peroneal tendon lengthening for, 1152
 radiographic features of, 1150–1151, 1150f–1151f
 subtalar arthrodesis for, 1152
 triple arthrodesis for, 1153, 1165f
 valgus deformity of, 1153, 1158
 gait in, 84
 hip in, 1173–1203, 1178f–1179f, 1180p–1183p, 1185f–1186f, 1188f–1190f, 1192p–1195p, 1196f–1198f, 1200p–1201p, 1202f, 1204p–1207p, 1208f–1210f
 adduction contracture surgery of, 1173, 1178–1179, 1179f, 1180p–1183p, 1184, 1185f
 flexion contracture surgery of, 1173, 1178f–1179f
 subluxation/dislocation of
 anterior, 1203, 1211f
 clinical features of, 1185
 in nonreconstructable hip, 1197–1201, 1207f–1209f
 incidence of, 1182
 pathophysiology of, 1182, 1184f, 1185, 1186f
 radiographic features of, 1185, 1187f
 surgical treatment of, 1184–1199, 1186f–1190f, 1192p–1207p
 complications of, 1199, 1208f
 femoral osteotomy in, 1191, 1196, 1196f
 indications for, 1187, 1189
 pathophysiological factors in, 1197, 1197f
 pelvic osteotomy in, 78–81, 79f–80f, 82p–83p, 84f, 86p–89p, 90f
 phases of, 1187, 1189
 soft tissue release in, 1180p–1183p, 1189–1193, 1192p–1195p
 histopathologic findings in, 1124
 knee in, 1158–1159, 1166f–1168f, 1166–1173, 1170p–1171p, 1172f–1178f
 hamstring spasticity from
 hamstring lengthening for, 1159, 1168f, 1170p–1171p
 measurement of, 1159, 1167f
 posture from, 1159, 1168f
 with fixed knee flexion contracture, 1159, 1167f
 rectus femoris transfer for, 1167–1169, 1174p–1175p
 rotational osteotomy for, 1169–1173, 1178f
- Cerebral palsy (*Continued*)
 limping from, 88
 management of, 1130–1203, 1132f–1211f
 goals of, 1130
 medical treatment of spasticity in, 1132–1134
 orthoses in, 1131–1132, 1132f–1133f
 outcome assessment in, 1232
 physical therapy in, 1130–1131
 rhizotomy in, 1231–1232, 1232f
 surgical, 1132f–1211f, 1134–1203. *See also under specific area, e.g., Cerebral palsy, knee in.*

 diagnosis of, 2087–2091, 2088f–2090f
 magnetic resonance imaging in, 2090–2091
 physical examination in, 2088
 radiography in, 2088–2090, 2088f–2090f
 initial management of, 2091, 2091f
 late complications of, 2098–2099
 mechanism of injury in, 2087
 pedicle, at C2, 2096, 2097f
 subaxial, 2096–2098, 2098f
 fusion of. *See* Spinal fusion, cervical.
- heterotopic ossification of, in fibrodysplasia ossificans progressiva, 1634, 1635f–1636f
 instability of, 206–210, 207f–209f
 in spondyloepiphyseal dysplasia congenita, 1528, 1528f–1529f
 ligamentous, 207
 occipital-atlantal, nontraumatic, 209

- Cervical spine (*Continued*)
 occipital-atlantal anomalies and, 206, 209
 odontoid anomalies and, 209
 os odontoideum and, 206, 207f
 subaxial instability and, 207, 209f, 210
 kyphosis of, 195f–205f, 195–206. *See also*
 Kyphosis, cervical.
 lateral bending of, 35, 35f
 osteoblastoma of, 1936, 1937f
 posterior ligamentous instability of, 2090,
 2090f
 pseudosubluxation of, 131–132, 132f, 206f,
 2089–2090, 2090f
 range of motion of, 32–35, 34t, 35f
 rheumatoid arthritis of, 1819
 rotation of, 35
 spina bifida occulta of, in diastrophic
 dysplasia, 1536, 1537f
 spondylolysis of, in scoliosis, from cerebral
 palsy, 1231
 upper, instability of, in Down syndrome,
 1617f, 1617–1618
 treatment of, 1619–1621, 1620f
 Cervicothoracic incision, for forequarter
 amputation, 2000p–2001p
 Cervicothoracic spine, abnormalities of, in
 congenital scoliosis, 286f
 Chamberlain's line, in Klippel-Feil syndrome,
 176–177, 182f
 Charcot joint, 1827–1828, 1828f–1829f
 from congenital insensitivity to pain, 1448,
 1451f–1452f, 1827–1828, 1828f–1829f
 in lipomeningocele, 1303, 1304f
 Charcot-Marie-Tooth disease
 type 1, 1435–1445, 1436f–1447f
 claw toe in, 995f, 998f, 1438f–1439f,
 1440–1441
 clinical features of, 1435, 1436f
 diagnosis of, 1435–1436, 1437f
 genetic basis of, 1435
 hip dysplasia in, 1441, 1444f
 pes cavovarus in, 1436, 1438f–1442f, 1440
 pes cavus in, 995f, 998f, 1002f
 scoliosis in, 1441, 1445f–1446f
 treatment of, triple arthrodesis in, 1440,
 1443f
 type 2, 1445
 upper extremity weakness in, 1441, 1444,
 1447f
 Charleston brace, for scoliosis, idiopathic, 231,
 231f
 Check rein procedure, for talipes equinovarus,
 940, 941f
 Cheilectomy, for Legg-Calvé-Perthes disease,
 701
 Chemical shift artifact(s), on magnetic
 resonance imaging, 155
 Chemotherapy
 for congenital fibrosarcoma, 2042
 for osteosarcoma, 1962–1963
 for rhabdomyosarcoma, 2040–2041
 for soft tissue sarcoma, 2046
 Chevron osteotomy, for hallux valgus, 1016,
 1017f
 Chiari malformation(s), 1253, 1254f
 Chiari osteotomy
 for acetabular augmentation, 642, 644f, 646
 for avascular necrosis, 596
 for hip arthrodesis, for proximal focal
 femoral deficiency, 1770, 1773f–1774f
 for Legg-Calvé-Perthes disease, 701, 703f
 for subluxation/dislocation of hip, in cerebral
 palsy, 1197–1198, 1198f
 “Chicken wire” calcification, in
 chondroblastoma, 1929, 1930f
 Chief complaint, in orthopaedic history, 23, 71
 Child(ren)
 cooperation milestones in, 381, 381t
 distraction of, 398
 Child abuse, 2079, 2081
 diagnosis of, bone scan in, 167, 167f
 femoral fractures from, 2302
 vs. osteogenesis imperfecta, 1728–1729
 Childbirth, clavicular fractures during, 2116,
 2119
 Chondroblastoma, 1929–1930, 1930f–1931f
 Chondrocyte(s), disordered, in slipped capital
 femoral epiphysis, 717f, 717–718
 Chondrodiastasis, for limb lengthening,
 1082–1083
 Chondrodysplasia, metaphyseal, 1547–1549,
 1548f–1549f
 Jansen type, 1547
 Schmid type, 1547–1548, 1548f–1549f
 Chondrodysplasia punctata, 1544f–1546f,
 1545–1546
 clinical features of, 196, 197f
 Chondroectodermal dysplasia, 1679f–1681f,
 1679–1682
 clinical features of, 1679–1680, 1679f–1680f
 genetic basis of, 1679
 radiographic features of, 1680–1681,
 1680f–1681f
 treatment of, 1681f, 1681–1682
 Chondrolysis
 in slipped capital femoral epiphysis,
 747–750, 749f
 clinical features of, 747–748, 749f
 epidemiology of, 748–749
 etiology of, 749
 from pin penetration, 730–731
 natural history of, 749–750
 pathology of, 749
 treatment of, 750
 limping from, 91, 91f
 Chondromatosis, synovial, 1944, 1946f
 Chondromyxoid fibroma, 1930–1933, 1932f
 Chondro-osseous tissue, in osteopetrosis, 1550,
 1551f
 Chondrosarcoma, 2038–2040
 progression of hereditary multiple exostosis
 to, 1924, 1926
 progression of multiple enchondromatosis
 to, 1928–1929
 progression of solitary osteochondroma to,
 1920, 1921t
 Chorionic villus sampling (CVS), and limb
 defects, 1755
 Chotzen's syndrome, anesthesia in, 120t
 Christmas disease, 1879
 Chronic renal failure, and slipped capital
 femoral epiphysis, 716
 Chuinard ankle fusion, for triceps surae muscle
 paralysis, 1372
 Chylothorax, in Gorham's disease, 1569f
 Cincinnati incision, for open reduction of
 vertical talus, 966, 968p–971p
 Ciprofloxacin, for puncture wounds, 1865
 Circulation, collateral, around elbow, 2163f
 Circumduction, during ambulation with
 prosthesis, 1802
 Circumflex artery(ies)
 anatomy of, 2284, 2284f–2285f
 medial, blood flow in, and Legg-Calvé-
 Perthes disease, 661f
 CK (creatine kinase), in muscular dystrophy,
 1465–1466
 Clamping mechanism, for Texas Scottish Rite
 Hospital instrumentation, 243, 243f,
 246p–247p
 Clasped thumb, 447
 rotation flap for, 444, 447f
 Clavicle
 anatomy of, 2f–3f, 2115
 “duplicated,” 2115, 2117f
 hypoplasia/absence of, in cleidocranial
 dysostosis, 1568f–1569f, 1568–1570
 injuries to, 2115–2121, 2116f–2120f
 complications of, 2121
 diagnosis of, 2116, 2118, 2118f
 during childbirth, 2116, 2119
 mechanism of, 2116, 2118f
 midshaft, 2116, 2118, 2118f
 physal, 2115, 2116f, 2118
 radiographic features of, 2118–2119, 2119f
 treatment of, 2119–2120, 2119f–2120f
 sectioning of, in forequarter amputation,
 2008p–2009p
 “Claw,” placement of, in Texas Scottish Rite
 Hospital instrumentation, 254p–255p
 Claw toe
 in Charcot-Marie-Tooth disease, 995f, 998f,
 1438f–1439f, 1440–1441
 in pes cavus, 991, 995f, 998f
 Cleft foot, 983f, 983–984
 Cleft hand, with central polydactyly, 423, 423f
 Cleidocranial dysostosis, 1568f–1569f,
 1568–1570
 clinical features of, 1568f, 1569
 genetic features of, 1568–1569
 orthopaedic management of, 1569f, 1570
 radiographic features of, 1569f, 1569–1570
 Cleidocranial dysplasia, differential diagnosis of,
 1564t
 Clinodactyly, in Down syndrome, 1616f
 Closing wedge osteotomy
 Dwyer, for pes cavus, 995, 999,
 1000p–1001p, 1002f
 for angular deformities of leg, 1107, 1110f
 for cubitus varus, from supracondylar
 humeral fractures, 2168, 2169f–2171f
 for physiologic genu valgum, 860–861, 863f
 of midcarpus, in arthrogyrosis, 1655
 plantar, for dorsal bunion, 944, 945f
 valgus, of proximal femur, with distal-lateral
 advancement of greater trochanter,
 614p–617p
 varus, for ankle valgus, in hereditary
 multiple exostosis, 1924, 1925f
 Clotting factor, for hemophilia, 1885–1887
 “Cloverleaf” skull, in thanatophoric dwarfism,
 1521
 Clubfoot. *See* Talipes equinovarus.
 Clubhand, radial
 free joint transfer in, 511, 511f
 surgical treatment of, 382
 CNS (central nervous system), tumors of, and
 torticollis, 193, 193f
 Coagulopathy, and Legg-Calvé-Perthes disease,
 656–657
 Cobb method, for measurement of curve in
 scoliosis, 225, 225f
 Cobb periosteal elevator(s), for Texas Scottish
 Rite Hospital instrumentation, 250p–251p
 Coccidioidomycosis, 1870, 1870f
 “Cock robin” appearance, in congenital
 muscular torticollis, 171, 173f
 Cock-up splint, for wrist, 394, 395f–396f, 396

- Codman's triangle, 1898
in osteosarcoma, 1959f
- Codman's tumor, 1929–3430, 1930f–1931f
- Cognitive function
in myelomeningocele, 1255
in neurofibromatosis, 1628–1629
- Cold abscess(es), in tuberculous arthritis, 1832–1833, 1833f
- Coleman block test
for pes cavus, 986, 988f
in Charcot-Marie-Tooth disease, 1436, 1439f
- Collaboration, multidisciplinary
in treatment of myelomeningocele, 1260
in treatment of rheumatoid arthritis, 467
- Collagen, metabolism of, 1718, 1719f
in osteogenesis imperfecta, 1718–1722
- Collagen vascular disease, anesthesia in, 120t
- Collateral circulation, around elbow, 2163f
- Collimator(s), 133
- Color Doppler ultrasonography, 163
- Communication
with parents, during physical examination, 72–73
with referring physicians, 73
- COMP (cartilage oligomeric matrix protein), and pseudoachondroplasia, 1523
- Compartment syndrome, 2075–2077, 2077f–2078f
diagnosis of, 2076, 2077f
from femoral shaft fractures, 2319
from Monteggia fractures, 2225
from open tibial fractures, 2386, 2386f
from proximal tibial physical fractures, 2351
from radial/ulnar fractures, 2233
from tibial tuberosity fractures, 2343
in elbow, 2141
of forearm, 403
of hand, 404
pathophysiology of, 2075–2076
prevention of, 2076
- Composite graft, for fingertip reconstruction, in syndactyly, 441, 441f
- Compression fracture(s)
in osteoporosis, juvenile idiopathic, 1716f
of cervical spine, 2097
treatment of, 2105

 Femoral deficiency, proximal focal (*Continued*)
 Hamanishi, 1758–1759, 1760f
 clinical features of, 1760–1761, 1761f
 diagnosis of, ultrasonography in, 164, 165f
 prostheses for, 1611f, 1763, 1804
 treatment of, 1762f, 1762–1763, 1764p–1767p, 1770–1773, 1770f–1778f
 amputation in, 1762f, 1762–1763, 1764p–1767p
 femoral pseudarthrosis stabilization in, 1763, 1772f
 hip stabilization in, 1763, 1770, 1773f–1775f
 limb lengthening in, 1769–70, 1773, 1773f–1774f
 options for, 1762
 rotationplasty in, 1763, 1768f–1769f
 surgical principles in, 1770–1771, 1773t, 1776f
 Femoral epiphysis, growth of, 2283–2284, 2284f
 Femoral head
 arterial circulation in, and Legg-Calvé-Perthes disease, 658f, 658–661, 660f–662f
 avascular necrosis of. *See* Avascular necrosis (AVN).
 blood supply to, and Legg-Calvé-Perthes disease, 658f
 displacement of, in cerebral palsy, 1184f
 double infarcts in, and Legg-Calvé-Perthes disease, 661, 662f, 669–670
 flattening of, in multiple epiphyseal dysplasia, 1533f–1534f
 ossification of, delayed, in diastrophic dysplasia, 1538, 1538f
 osteochondritic lesions in, after treatment of Legg-Calvé-Perthes disease, 701, 704f
 penetration of fixation devices into, 720, 721f
 reduction of, in open reduction of hip, medial approach to, 558p–559p
 reossification in, in Legg-Calvé-Perthes disease, 675, 675t, 677f
 seating of, in evaluation of closed hip reduction, 544–546, 544f–547f
 shape of, and prognosis in Legg-Calvé-Perthes disease, 702–704
 varus deformity of, in developmental coxa vara, 766f
 venous drainage of, in Legg-Calvé-Perthes disease, 661, 663f
 Femoral head-neck angle, measurement of, Southwick method of, 714, 714f
 Femoral head-neck osteoplasty, for residual deformity from slipped capital femoral epiphysis, 745, 746f
 Femoral hypoplasia-unusual facies syndrome, 1753f, 1754
 Femoral metaphysis, radiographic changes in, in Legg-Calvé-Perthes disease, 675–678, 678f–679f
 Femoral neck
 fractures of. *See* Hip, fractures of.
 length of, and mechanical stress in coxa vara, 770, 771f
 venous drainage of, in Legg-Calvé-Perthes disease, 661, 663f
 Femoral neck-shaft angle, in developmental coxa vara, 767–768, 767f–768f, 770, 770f
 Femoral nerve
 injury to, from Salter innominate osteotomy, 621
 lateral cutaneous, protection of, during Salter innominate osteotomy, 634p–635p
 Femoral nerve (*Continued*)
 palsy of, in hemophilia, 1883–1884
 protection of, in Barr erector spinae transfer, 1338p–1341p
 Femoral osteotomy
 for Legg-Calvé-Perthes disease, 696–698, 699f–700f
 for pseudoachondroplasia, 1524
 varus derotation, for hip subluxation/dislocation, in cerebral palsy, 1191, 1196, 1196f
 with traction, for limb lengthening, 1079, 1079f
 Femoral physis, radiographic changes in, in Legg-Calvé-Perthes disease, 678–679, 680f
 Femoral shaft, fractures of, 2301f–2318f, 2301–2320
 anatomic considerations in, 2301f, 2301–2302
 and leg length inequality, 1040
 classification of, 2302
 displacement patterns in, 2303, 2304f
 mechanism of, 2302, 2303f
 nonunion of, 2319
 pathologic, 2302, 2303f
 physical examination in, 2302
 radiographic features of, 2302–2303, 2303f–2304f
 recurrence of, 2308, 2311f
 treatment of, 2303–2319, 2305f–2318f
 external fixation in, 2308, 2310, 2310f–2311f
 in child 6 to 10 years, 2305, 2306f
 in child 7 months to 5 years, 2304–2305, 2306f
 in child 11 years to skeletal maturity, 2305
 in infant 0 to 6 months, 2304, 2305f
 intramedullary fixation in, 2313–2314, 2313f–2316f
 intramedullary nailing in, 2314, 2317f–2318f, 2319
 open reduction/internal fixation in, 2310, 2312f, 2313
 spica cast in, 2308, 2308f–2309f
 traction in, 2305, 2307f, 2307–2308
 Femoral varus derotation osteotomy (VDRO), for hip subluxation/dislocation, in cerebral palsy, 1191, 1196, 1196f
 Femoral vein, dissection of, in mid thigh amputation, 1984p–1985p
 Femoral vessel(s), retraction of, in open reduction of hip, medial approach to, 552p–555p
 Femoral/innominate osteotomy, for Legg-Calvé-Perthes disease, 699
 Femoral-tibial angle
 measurement of, 26f
 normal, 1103, 1106f

 treatment of, 2105–2106
 cerebral palsy and, 1230, 1232
 classification of, 2064–2065, 2064f–2065f
 compression. *See* Compression fracture(s).
 epidemiology of, 2059
 hangman’s, 2098, 2099f
 in pyknodysostosis, 1567
 in osteogenesis imperfecta, 1722f, 1723–1724
 Jefferson, 2094
 nonunion of
 in congenital insensitivity to pain, 1450f
 in osteogenesis imperfecta, 1731
 open, 2074t, 2074–2075
 risk of, myelomeningocele and, 1262, 1263f
 vascular injuries from, 2078f, 2078–2079
- Fracture callus, development of, for limb lengthening, 1083, 1085f
- Fracture table(s), for percutaneous in situ pinning of slipped capital femoral epiphysis, 722–723, 723f, 724p–727p
- Fragilitas ossium, anesthesia in, 124t
- Frantz and O’Rahilly classification
 of fibular deficiency, 1775
 of limb deficiencies, 1747–1748, 1747f–1749f
- Freckling, in neurofibromatosis, 1625, 1627f
- Free joint transfer, in radial clubhand, 511, 511f
- Free motorized muscle transfer, microsurgery for, 504, 507f
- Free tissue transfer, microsurgery for, 504, 505f–506f
- Free toe transfer, microsurgery for, 504, 508, 508f
- Free vascularized bone transfer, microsurgery for, 508, 509f–511f, 512
- Freeman-Sheldon syndrome, 1662, 1663f
- Freiberg’s infarction, 900–901, 901f
- Frejka pillow, 538, 538f
- French technique, of manipulation, for talipes equinovarus, 929, 933f–934f
- Friedreich’s ataxia, 1246–1248, 1247f
 anesthesia in, 121t
- Frog leg radiographic view, in slipped capital femoral epiphysis, 719, 720f
- “Frog-leg” deformity, in myelomeningocele, 1256
- Functional Independence Measure (FIM), 2105f

- Functional training, for poliomyelitis, during chronic phase, 1326
- Fungal osteomyelitis, 1869–1870, 1870f
- Gadolinium, for magnetic resonance imaging, 156
- GAG(s) (glycosaminoglycans), urinary, in mucopolysaccharidosis, 1572
- Gait
- analysis of
 - in adolescent, 85–86
 - in cerebral palsy, 1126f–1129f, 1126–1130 with equinovarus deformity, 1142–1143, 1143f
 - in school-age child, 85
 - in toddlers, 85, 86f
 - laboratories for, 81f, 82
 - purpose of, 1130
 - ankle dorsiflexion and, 77, 78f
 - antalgic, 83
 - in Legg-Calvé-Perthes disease, 672f
 - cadence parameters in, 75–76, 76t
 - calcaneus, after talipes equinovarus surgery, muscle transfers for, 946, 947f
 - crouch, in cerebral palsy, 1158–1159, 1166f
 - correction of, 1158–1159, 1168f, 1170p–1171p
 - determinants of, 77, 77t
 - developmental milestones in, 20
 - energy for, 76–77, 77t
 - function of, 76
 - in coxa vara, 89, 90f
 - in developmental dysplasia of hip, 89, 90f
 - in Duchenne muscular dystrophy, 1467, 1468f
 - in femoral anteversion, 783, 785f
 - in hypertrophic interstitial neuritis, 1445
 - in Legg-Calvé-Perthes disease, 89–90, 91f
 - in myelomeningocele, level of lesion and, 1256–1257
 - in spastic diplegia, 81f
 - kinematics and, 77–79, 78f–79f
 - in coronal plane, 77–78, 78f
 - in sagittal plane, 77, 78f–79f
 - in transverse plane, 78–79, 79f
 - kinetics and, 80f, 81
 - leg length inequality and, 84, 1040–1041
 - limping. *See* Limp.
 - muscle activity and, 79t, 79–81, 80f
 - neurologic control of, 76
 - pathologic, 81, 81f
 - problems with, from lower extremity prostheses, 1805–1806
 - short-limb, 84
 - spastic, 84
 - stance phase of, 75, 76f
 - muscle activity during, 80–81
 - swing phase of, 75, 76f
 - muscle activity during, 80–81
 - temporal aspects of, 75–76, 76t
 - toe-in, persistent, with talipes equinovarus, supramalleolar osteotomy for, 950–951, 952f
 - Trendelenburg. *See* Trendelenburg gait.
 - with proximal muscle weakness, 84, 85f
 - β -Galactosidase, deficiency of, in Morquio syndrome, 1577
 - Galant's reflex, 52, 54f
 - Galeazzi fracture(s), 2235, 2238
 - Galeazzi procedure, for patellar dislocation, 2353, 2353f
 - Galeazzi sign, in developmental dysplasia of hip, 525–526, 525f–526f
 - Gallie fusion
 - for atlantoaxial arthrodesis, 187f
 - for atlantoaxial instability, 2092, 2094f–2095f
 - Galveston technique, for spinal fusion, in cerebral palsy, 1227, 1230f
 - Gamma rays(s), in nuclear imaging, 166
 - Ganglion(s), of upper extremities, 496–497
 - Ganglioside, for spinal cord injury, GM₁, 2106–2107
 - Gangliosidosis, anesthesia in, 125t
 - Gangrene, in purpura fulminans, 1792
 - Ganz osteotomy, for acetabular repositioning, 633, 642, 643f
 - Gardner's syndrome, anesthesia in, 121t
 - Gastrocnemius muscle
 - bursa of, popliteal cyst in, 829, 829f
 - recession of, for equinus deformity, in cerebral palsy, 1136, 1137f–1139f
 - Gastrosoleus muscle
 - botulinum toxin injection of, for spasticity, in cerebral palsy, 1133–1134
 - contraction of, during gait, 79–80
 - pseudohypertrophy of, in Duchenne muscular dystrophy, 1468, 1468f
 - Gaucher's disease, 1642–1645, 1643f–1644f
 - clinical features of, 1643
 - diagnosis of, 1643
 - genetic basis of, 1642
 - orthopaedic manifestations of, 1643–1645, 1644f
 - pathology of, 1642–1643, 1643f
 - treatment of, 1645
 - Gender
 - and incidence of slipped capital femoral epiphysis, 711–712
 - and interpretation of radiographs, 127–128
 - and natural history of scoliosis, 215
 - Gene therapy
 - for Duchenne muscular dystrophy, 1477
 - for hemophilia, 1879
 - Generator(s), for radiography, 133
 - Genital(s), development of, in females, 19, 19f
 - Genitourinary tract, injuries to, with pelvic fractures, 2255–2256
 - Genu recurvatum
 - acquired, 825, 828–829
 - after biceps femoris tendon transfer, 1357
 - in poliomyelitis, 1358–1360, 1359f–1360f
 - Genu valgum, 855–863, 859f–866f
 - degree of, measurement of, 26
 - hypoplastic tibial epiphysis and, 1680, 1680f
 - in diastrophic dysplasia, 1537, 1538f
 - in metaphyseal dysplasia, 863
 - in Morquio syndrome, 1579, 1579f
 - in proximal tibial fracture, 861, 864f
 - in pseudoachondroplasia, 1524, 1524f
 - in rickets, 861, 863
 - in spondyloepiphyseal dysplasia, 861, 865f
 - physiologic, 855–863
 - hemiphysiodesis for, 855, 858–860, 860f–861f
 - stapling in, 859–860, 862f
 - timing of, 855, 858
 - osteotomy for, 860–861, 863f
 - Genu varum, 839–855, 840f–858f. *See also* Tibia vara.
 - degree of, measurement of, 26
 - in achondroplasia, surgical treatment of, 1517, 1518f
 - Genu varum (*Continued*)
 - in metaphyseal chondrodysplasia, 1547–1548, 1548f
 - in multiple enchondromatosis, 1929f
 - in pseudoachondroplasia, 1524, 1524f
 - in vitamin D-resistant rickets, 1691f–1693f
 - physiologic, 839–840, 840f–842f
 - vs. infantile tibia vara, 844
 - Geographic location, and incidence of slipped capital femoral epiphysis, 711
 - Gestation, multiple, and incidence of cerebral palsy, 1123
 - Gestational age, and incidence of cerebral palsy, 1123
 - Giant cell(s)
 - in aneurysmal bone cyst, 1908, 1908f
 - in nonossifying fibroma, 1942, 1942f
 - Giant cell tumor(s), of tendon sheath, in upper extremities, 502
 - Gigantism
 - cerebral, anesthesia in, 125t
 - digital. *See* Macroductyly.
 - infantile, anesthesia in, 120t
 - localized, 1024, 1025f
 - Gigli saw, placement of, in Salter innominate osteotomy, 636p–639p
 - Gillespie and Torode classification, of femoral deficiency, 1759–1760
 - Gillespie classification, of femoral deficiency, 1760, 1760f
 - Glasgow Coma Scale, 2073, 2073t
 - Glenohumeral joint
 - range of motion of, assessment of, 28f, 29–31, 30f–31f
 - traumatic dislocation of, 2128–2132, 2129f–2131f
 - anatomic considerations in, 2128–2129, 2129f
 - complications of, 2131–2132
 - diagnosis of, 2129–2130, 2130f
 - mechanism of, 2129
 - treatment of, 2130–2131, 2130f–2131f
 - Gloma, optic, in neurofibromatosis, 1625, 1628
 - Glomus tumor(s)
 - of toe, 1032
 - of upper extremities, 502
 - Glucocerebrosidase, for Gaucher's disease, 1645
 - Gluteus maximus muscle
 - dissection of, in Banks and Coleman hemipelvectomy, 1968p–1969p
 - injections into, and sciatic nerve palsy, 1455–1456
 - paralysis of, in poliomyelitis, 1336–1337, 1348–1349, 1348f–1349f
 - Barr erector spinae transfer for, 1336–1337, 1348, 1348f
 - Hogshead fascia lata transfer to lumbodorsal fascia in, 1349, 1349f
 - motor evaluation in, 1336
 - Gluteus medius muscle
 - dissection of
 - in hip disarticulation, 1976p–1977p
 - in trochanteric transfer, for avascular necrosis, 602p–603p, 606p–607p
 - paralysis of, in poliomyelitis, 1336, 1338p–1347p
 - Gluteus minimus muscle, dissection of, in hip disarticulation, 1976p–1977p
 - Gluteus muscle(s), dissection of, in open reduction of hip, using anterolateral approach, 562p–563p
 - Glycosaminoglycans (GAGs), urinary, in mucopolysaccharidosis, 1572

- GM₁ ganglioside, for spinal cord injury, 2106–2107
- Goldenhar's syndrome, anesthesia in, 121t
- Gonad(s), shielding of, during radiography, 135–137, 136f–137f
- Goniometry, 27t, 27–28
in assessment of angular deformities, 25–26, 26f
- Gonococcal arthritis, 1835–1836, 1864–1865
- Gonosomal aneuploidy, anesthesia in, 122t
- Gorham's osteolysis, 1570–1571, 1571f
- Gottron's sign, in dermatomyositis/
polymyositis, 1493, 1494f
- Gowers' sign, 84, 85f, 1463, 1464f
in Duchenne muscular dystrophy, 1468
- Gracilis muscle
for free toe transfer, 504, 508f
transfer of
for elbow flexion, in arthrogryposis, 1655
for Volkmann's contracture of forearm, 408, 409f
- Gracilis tendon, transfer of rectus femoris tendon to, 1174p–1177p
- Graf classification, of developmental dysplasia of hip, 527–530, 529f, 529t
- Granuloma
eosinophilic. *See* Eosinophilic granuloma.
giant cell reparative, 1908, 1908f
pyogenic, of upper extremities, 502
- Grasp reflex
palmar, 46, 50f
plantar, 46, 50f
- Great toe, malformations of, in fibrodysplasia ossificans progressiva, 1632, 1633f
- Greater trochanter, epiphysiodesis of, for developmental coxa vara, 772–773
- Green and Grice procedure, for posterior tibialis tendon transfer, for calcaneus deformity, 1380p–1385p
- Green modification, Phemister technique, of epiphysiodesis, for leg length inequality, 1058–1063, 1062f, 1064p–1071p, 1072f
- Green-Anderson growth remaining chart, 2068f
- Green's quadricepsplasty, for recurrent patellar dislocation, 798, 806p–809p
- Greenstick fracture(s), 2058, 2059f
creation of, in closing wedge valgus osteotomy, 102p–103p
of distal forearm, 2059f
treatment of, 2235
tibial, proximal metaphyseal, 2373, 2373f
- Grice extra-articular arthrodesis, for pes valgus, in cerebral palsy, 1152, 1154p–1157p, 1158f
- Grice procedure, 1396p–1399p
for vertical talus, 967
- Grid(s), radiographic, 133
- Grieving process, stages of, 381
- Gross motor skill(s), developmental milestones in, 4f, 19–20, 20t
- Ground-glass appearance, of bone, in renal osteodystrophy, 1697, 1697f
- Ground-reaction ankle-foot orthoses
for cerebral palsy, 1131
for myelomeningocele, 1292, 1293f
- Growth
and head circumference, 10, 11f–12f
and height, 10, 13f–18f
in boys, 10, 13f, 15f, 17f
in girls, 10, 14f, 16f, 18f
and weight
in boys, 10, 13f, 15f, 17f
in girls, 10, 14f, 16f, 18f

- Subclavius muscle, dissection of, in forequarter amputation, 2008p–2009p
- Subcortical nuclei, and neonatal reflexes, 46
- Subcutaneous instrumentation, with spinal fusion, for infantile idiopathic scoliosis, 279–280
- Sublaminar hook, in Texas Scottish Rite Hospital instrumentation, 256p–257p
- Sublaminar wire(s), for stabilization of cervical spine, in Down syndrome, 1620, 1620f
- Subscapularis muscle
and shoulder motion, 1395
paralysis of, in poliomyelitis
latissimus dorsi tendon transfer for, 1407, 1409f
pectoralis minor tendon transfer for, 1407, 1408f
serratus anterior tendon transfer for, 1407, 1407f
teres major tendon transfer for, 1407, 1409f
- Subscapularis tendon, lengthening of, for brachial plexus palsy, 484–485
- Subtalar arthrodesis, extra-articular, of foot and ankle, for poliomyelitis, 1388, 1396p–1399p
- Subtalar coalition, limping from, 92f
- Subtalar joint
arthrodesis of, for pes valgus, in cerebral palsy, 1150
arthroereisis of, for pes planovalgus, 915, 915f
bony coalition of, computed tomography in, 143f
coalition of, 978f
in pes cavus, 989, 989f
motion of, in tarsal coalition, 974, 975f
release of, for talipes equinovarus, 937, 938f–939f
valgus deformity of, in myelomeningocele, 1268–1269
- Subungual exostosis, 1032, 1033f
- Sucking reflex, 55
- “Sunburst” appearance, in osteosarcoma, 1957, 1958f–1959f
- Supination
assessment of, 31, 33f
definition of, 27t
- Supination contracture(s), of forearm, in poliomyelitis, 1424–1427
- Suppurative myositis, 1496
- Supracondylar osteotomy
for femoral anteversion, 786
of metacarpal joint, for radial polydactyly, 430, 431f
- Supramalleolar osteotomy
for talipes equinovarus, with persistent toe-in gait, 950–951, 952f
for tibial torsion, 867, 867f
- Supraspinatus muscle
and shoulder motion, 1395
paralysis of
levator scapulae transfer for, 1407, 1408f
sternocleidomastoid transfer for, 1407, 1409f
- Sural nerve, biopsy of, in Charcot-Marie-Tooth disease, 1436
- Suspension traction, after hamstring lengthening, 1336, 1337f
- Suture(s), for hand surgery, 384–385, 385f
- Swayback, in developmental dysplasia of hip, 89, 90f
- Swing phase, 75, 76f
muscle activity during, 80–81
- Symbrachydactyly
classification of, 1783, 1784f
treatment of, 1783–1785, 1784f–1785f
vs. congenital band syndrome, 461, 463f
- Syme amputation, with knee arthrodesis, for femoral deficiency, 1762f, 1762–1763, 1764p–1767p
- Syme prosthesis, for proximal focal femoral deficiency, 1794
- Symmetric tonic neck reflex, 54, 55f
- Symphysis pubis, open reduction/internal fixation of, 2266–2267, 2267f
- Synchondrosis
ischiopubic, 130f, 131
vs. fractures, 130f, 130–131
vs. infections/neoplasms, 130f, 131
- Syndactyly, 433–444, 434f–447f, 435t
classification of, 434
conditions associated with, 435, 435t
cutaneous, 434
treatment of, 436–442, 436f–444f
dressing application in, 441–442, 443f
flap closure in, 439, 439f
graft attachment in, 440, 441f
graft harvest and donor site closure in, 440, 440f
incision for, 437–438, 437f–439f
preparation for, 437
principles of, 436, 436f
release of tourniquet in, 440
separation of digits in, 438–439, 439f–440f
skin grafts for, 436, 436f
patterns of, 439, 440f
tip reconstruction in, 441, 441f
etiology of, 433
“fenestrated,” 1786, 1787f
historical perspective on, 433
imaging studies of, 435
incidence of, 434–435, 435f
of thumb-index web, 442, 444, 445f–447f
of toes, 1023–1024, 1023f–1024f
pathology of, 433–434, 434f
treatment of
complications of, 444
timing of, 436
with central polydactyly, 423, 423f
- Synostosis, from radial/ulnar fractures, 2233
- Synovectomy
for hemophilic arthropathy, 1888–1889
for rheumatoid arthritis, 1820
of hand, 474
for tuberculous arthritis, 1831
of wrist, 471
- Synovial chondromatosis, 1944, 1946f
- Synovial cyst(s), of upper extremity, 496–497
- Synovial fluid
analysis of, 1811, 1812f, 1813, 1814t
in tuberculous arthritis, 1831
aspiration of, in septic arthritis, 1852
properties of, 1811
viscosity of, 1813, 1814t
- Synovial popliteal cyst(s), 830f, 831
- Synovial sarcoma, 2044f
- Synoviorthesis, for hemophilic arthropathy, 1889
- Synovitis
and Legg-Calvé-Perthes disease, 665
in dermatomyositis/polymyositis, 1494
- Synovitis (*Continued*)
of finger, 472–473, 473f
of hip, acute transient, 1823–1825
of thumb, 472
of wrist, 469, 469f
treatment of, 470–472, 470f–472f
exercise in, 470
intra-articular corticosteroid injections in, 470, 470f–471f
pigmented villonodular, 1944–1946, 1946f–1947f
toxic, 1823–1825
vs. septic arthritis, 1850
transient, limping from, 86, 87f
- Synovium, pathology of, in rheumatoid arthritis, 1815–1816, 1815f–1816f
- Syphilis, 1869, 1869f–1870f
- Syringomyelia, 1449t, 1454, 1454f
after spinal cord injury, 2108
back pain in, 102
- Syrinx, diagnosis of, magnetic resonance imaging in, 161f
- T1 (relaxation time), longitudinal, in magnetic resonance imaging, 152, 152f
- T2 (relaxation time), transverse, in magnetic resonance imaging, 152, 152f
- Tachdjian brace, for Legg-Calvé-Perthes disease, 696, 697f
- Talectomy, for equinovarus, in myelomeningocele, 1264
- Talipes calcaneovalgus, 903–904, 907, 907f
- Talipes equinovarus, 922–957, 924f–957f
classification of, 927, 930f–931f
diagnosis of, 927, 927f–930f
differential diagnosis of, 927
embryology of, 923
etiology of, 923
in arthrogryposis, 1653–1654
in diastrophic dysplasia, 1535, 1535f
in Freeman-Sheldon syndrome, 1663f
in myelomeningocele, 1263–1264
pathologic anatomy of, 923–927, 924f–926f
recurrence of, lateral column shortening for, 946, 948, 949f
residual hindfoot, 929, 935f
severity of, 930f–931f
treatment of
nonoperative, 927–934, 932f–934f
operative, 933–941, 936f–941f
Achilles tendon lengthening in, 931–932, 937, 938f
“cable cast” in, 937
calcaneal osteotomy in, 948, 950, 950f
calcaneocuboid release in, 935–936, 937f
complications of, 941–945, 943f–945f
current technique in, 937–941, 938f–941f
talonavicular pinning in, 935, 936f
tibiotalar release in, 936
timing of, 935
results of, 922
revision after, 945–946, 947f
with residual deformity, Dwyer technique for, 948, 950, 950f
with residual deformity, Ilizarov technique for, 951, 953, 954f–957f
- Talipes equinus
and knee extension, 1356f
in arthrogryposis, 1649f
in myelomeningocele, 1263
- Talocalcaneal angle, in vertical talus, 961, 965f

- Talocalcaneal bridge, fetal, and tarsal coalition, 967, 974f
- Talocalcaneal coalition, 978f
treatment of, 981, 981f
- Talocalcaneal ligament, release of, for talipes equinovarus, 939, 940f
- Talocalcaneocuboid coalition, 976f
- Talocalcaneonavicular joint, dorsolateral dislocation of, open reduction of, 966–967, 968p–973p
- Talonavicular joint
exposure of, in triple arthrodesis, 1390p–1391p
pinning of, for talipes equinovarus, 935, 936f
release of, for talipes equinovarus, 939, 939f
- Talonaviculocuneiform complex, medial imbrication of, for pes planovalgus, 916, 918f, 920f
- Talus
abnormalities of, in talipes equinovarus, 923–924, 924f–925f
anatomy of, 2416, 2417f
beaking of, in tarsal coalition, 980, 980f
blood supply to, 2416, 2418f
bony connection with navicular, and tarsal coalition, 967, 975f
fractures of, 2414–2420, 2417f–2420f
classification of, 2416, 2418f–2419f
complications of, 2420
diagnosis of, 2416–2417, 2419f
mechanism of, 2416
osteochondral, 2420–2423, 2421f–2422f
classification of, 2421, 2421f
diagnosis of, 2421–2422
mechanism of, 2420–2421
treatment of, 2422f, 2422–2423
treatment of, 2417–2420, 2420f
in lateral process fractures, 2419–2420
in talar body fractures, 2419
in talar neck fractures, 2417–2419, 2420f
vertical, 959–967, 960f–966f, 968p–973p
clinical features of, 959, 960f
conditions associated with, 959
congenital, 67–68
definition of, 959
differential diagnosis of, 961
etiology of, 959
in arthrogryposis, 1654
in myelomeningocele, 1265
pathologic anatomy of, 959–961, 961f–964f
radiographic features of, 961, 965f–966f
treatment of, 966–967, 968p–973p
complications of, 967
- Tanner system, for patient evaluation, in scoliosis, 224
- Tanner's stages of development, 19, 19f
- TAP (Tone and Positioning) splint, 396, 397f
- TAR (thrombocytopenia-absent radius) syndrome, anomalies in, 1752, 1753f
- Tarsal bone(s), ossification of, 892f
- Tarsal canal artery, anatomy of, 2416, 2418f
- Tarsal coalition, 68, 967, 974t, 974f–981f, 974–982, 976t
clinical features of, 974–976, 975f–977f, 976t
conditions associated with, 974, 976, 976f–977f
etiology of, 967, 974, 974f–975f
historical aspects of, 967
imaging studies of, 976, 978f–980f, 980
incidence of, 967, 974t
- Tarsal coalition (*Continued*)
limping from, 92, 92f
treatment of, 980–981, 981f
complications of, 982
results of, 981–982
- Tarsal navicular, osteochondrosis of, 899–900, 899f–900f
- Tarsal osteotomy, Japas-V, for pes cavus, 999, 1006p–1009p
- Tarsometatarsal joint
fractures of, 2425–2428, 2426f–2429f
anatomic considerations in, 2426
classification of, 2426–2427, 2427f
complications of, 2428
diagnosis of, 2427, 2428f
mechanism of, 2426, 2426f
treatment of, 2427–2428, 2429f
Heyman-Herndon release of, for metatarsus adductus, 903, 906f
- Tay-Sachs disease, anesthesia in, 125t
- T-condylar fracture(s), of humerus, 2202, 2204f
- TE (echo time), in magnetic resonance imaging, 152, 152t

- osteosarcoma of, 1960f
- physeal arrest in, after ankle fractures, 2403–2405, 2404f, 2406f
- prediction of remaining growth in, 1048–1053, 1049t, 1050f–1055f, 1052t, 1056p–1057p
for timing of epiphysiodesis, 1053–1058, 1056p–1057p, 1058f
Menelaus method for, 1051, 1055f
- proximal, epiphysiodesis of, for leg length inequality, 1068p–1071p
- proximal physeal fractures of, 2344–2351, 2345f–2351f
anatomic considerations in, 2344–2345
classification of, 2345–2346, 2345f–2346f
complications of, 2348–2351
diagnosis of, 2347
- Tibia (*Continued*)
mechanism of, 2346–2347
treatment of, 2347–2348, 2348f–2350f
- pseudarthrosis of, and amputation, 881
- rotational osteotomy of, for cerebral palsy, in knee, 1169–1173, 1178f
- sectioning of, in below-knee amputation, 1998p–1999p
- shortening of, for leg length inequality, 1077, 1077f–1078f
- spinal fractures of, 2353–2357, 2354f–2359f
anatomic considerations in, 2354, 2354f
classification of, 2354, 2355f
complications of, 2355–2357
diagnosis of, 2354–2355
mechanism of, 2354
treatment of, 2355–2356, 2356f–2359f
arthroscopic, 2355–2356, 2358f
casting in, 2355
closed reduction in, 2355, 2356f
open reduction in, 2356, 2359f
- tuberosity fractures of, 2341–2344, 2342f, 2344f
anatomic considerations in, 2341–2342
classification of, 2342, 2342f
complications of, 2343–2344
diagnosis of, 2343
mechanism of, 2342–2343
treatment of, 2343, 2344f
- valgus deformity of, 1107, 1109f
from proximal metaphyseal fractures, 2373, 2374f
in hereditary multiple exostosis, 1923
varus deformity of, with Blount's disease, 1104f, 1107, 1109f
- Tibia vara, 840–855, 840f–858f
adolescent, 850–855, 852f–856f, 853t
clinical features of, 851, 852f–853f
definition of, 850
etiology of, 850–851
radiographic features of, 851, 852f–853f, 853t
treatment of, 851–855, 854f, 856f
external fixation in, 853, 855, 856f
lateral epiphysiodesis in, 851–853, 854f
osteotomy in, 851, 852f–853f
- classification of, 840
definition of, 840
from focal cartilaginous dysplasia, 855, 857f–858f, 858t
- infantile, 840–850, 843t, 843f–849f
classification of, 844f, 844–845, 846f
clinical features of, 841f, 841–842, 843f, 843t
differential diagnosis of, 844
etiology of, 840
physiology of, 840–841
radiographic features of, 842–844, 843t, 843f–844f
treatment of, 845–850, 847f–849f
orthoses in, 845–847, 847f
osteotomy in, 846f–849f, 847–850
- Tibial artery(ies)
anatomy of, 2416, 2418f
anterior, injury to, from tibial osteotomy, 850
- Tibial deficiency, 1778–1784, 1779f–1784f
anomalies in, 1780
clinical features of, 1779–1780, 1783f–1784f
Jones classification of, 1779, 1782f–1784f
prostheses for, 1805
treatment of, 1782–1784

- Tibial epiphysis
hypoplasia of, and genu valgum, 1680, 1680f
ossification of, in infantile tibia vara, 844, 844f
- Tibial fracture(s), proximal, genu valgum from, 861, 864f
- Tibial growth plate, preservation of, ankle arthrodesis with, 1395, 1400p–1405p
- Tibial metaphysis, osteochondroma of, angular deformity from, 1104f
- Tibial osteotomy
distal, for valgus ankle deformity, in myelomeningocele, 1265, 1268f
for adolescent tibia vara, 851, 852f–853f
for Ellis–van Crevelde syndrome, 1681
for infantile tibia vara, 846f–849f, 847–850
for metaphyseal chondrodysplasia, 1548f–1549f
- Tibial plateau fracture(s), diagnosis of, computed tomography in, 143f
- Tibial tendon(s). *See* Tibialis anterior tendon; Tibialis posterior tendon.
- Tibial torsion, 863–867, 867f
and alignment of foot, 1378, 1388f
and intoeing, 66, 66f, 866
clinical features of, 866
developmental anatomy and, 864, 866
from hip contractures, in poliomyelitis, 1330–1331
in femoral anteversion, 783, 786f
lateral, 866
treatment of, 866–867, 867f
- Tibialis anterior muscle, paralysis of, in poliomyelitis, 1364–1365, 1365f, 1366p–1371p
- Tibialis anterior tendon, transfer of
for correction of vertical talus, 972p–973p
for revision of talipes equinovarus treatment, 945–946
lateral, to metatarsal base, in poliomyelitis, 1364
split, for equinovarus deformity, in cerebral palsy, 1145–1146, 1148p–1149p
to calcaneus, 1264–1265, 1266p–1267p
- Tibialis muscle, anterior, contraction of, during gait, 79–81, 80f
- Tibialis posterior muscle, unopposed activity with triceps surae muscle, in poliomyelitis, 1365, 1372f, 1374p–1377p
- Tibialis posterior tendon
anterior transfer of
for pes cavus, 991
through interosseous membrane, in Duchenne muscular dystrophy, 1470, 1472p–1475p
lengthening of, for equinovarus deformity, in cerebral palsy, 1143, 1143f
transfer of
split, for equinovarus deformity, in cerebral palsy, 1143–1145, 1144f–1147f
through interosseous membrane, for anterior tibial muscle paralysis, 1374p–1377p
to dorsum of foot, for pes cavovarus, 1327, 1440f
to os calcis, for calcaneus deformity, in poliomyelitis, 1380p–1385p
- Tibiofemoral angle, changes in, in physiologic genu varum, 839, 842f
- Tibiofemoral joint, congenital subluxation of, 825
- Tibiofibular diastasis, in tibial deficiency, 1779, 1782f
- Tibiofibular joint, proximal, dislocation of, 2357–2361, 2359f–2361f
anatomic considerations in, 2359, 2359f
classification of, 2359, 2360f
complications of, 2361
diagnosis of, 2359–2360
mechanism of, 2359–2360
treatment of, 2360, 2361f
- Tibionavicular ligament, release of, for talipes equinovarus, 926, 926f
- Tibiotalar joint, release of, for talipes equinovarus, 937, 938f
- Tile and Pennal classification, of pelvic fractures, 2252, 2254, 2254f
- Tillaux fracture(s), 2405–2410, 2407f–2410f
closed reduction of, 2405, 2407
mechanism of, 2405, 2407f
open reduction of, 2407, 2409f–2410f
prognosis in, 2407, 2410
radiographic features of, 2405, 2408f
- Tissue transfer, free, microsurgery for, 504, 505f–506f
- TLSO(s) (thoracolumbosacral orthoses)
for idiopathic scoliosis, 229–231, 230f–231f, 233f
for Scheuermann's kyphosis, 328
- Toddler(s). *See also under specific disorder.*
ambidexterity in, 21
limping in, differential diagnosis of, 85, 86f
- Toddler's fracture, 2377
of tibia, 91–92, 92f
- Toe(s)
clawing of, in pes cavus, 991, 995f, 998f
curly, 1032, 1032f
deformities of, 1012f–1029f, 1012–1036, 1030p–1035p. *See also under* Hallux.
fifth, varus, 1024, 1027f–1029f, 1030p–1031p, 1032. *See also* Varus fifth toe.
fractures of, 2431–2432
glomus tumors of, 1032
great, malformations of, in fibrodysplasia ossificans progressiva, 1632, 1633f
hammer, 1027, 1034p–1035p
ischemic necrosis of, from correction of talipes equinovarus, with residual deformity, 953, 957f
mallet, 1027, 1033f
polydactyly of, 1021–1023, 1022f
with hallux varus, 1019, 1019f
syndactyly of, 1023–1024, 1023f–1024f
- Toe extensor(s)
paralysis of, in poliomyelitis, 1365, 1372f, 1374p–1377p
transfer to metatarsal heads, for pes cavus, 991, 994, 995f, 996p–997p
- Toe phalanges, transplantation of, to partial fingers, 1783, 1785f
- Toe transfer, free, microsurgery for, 504, 508, 508f
- Toeing-in
assessment of, 65f–66f, 65–67
persistent, with talipes equinovarus, supramalleolar osteotomy for, 950–951, 952f
- Toe-walking
conditions causing, 1135
in toddlers, 85, 86f
- Tone and Positioning (TAP) splint, 396, 397f
- Tone-reducing ankle-foot orthoses, for cerebral palsy, 1131
- Tonic neck reflex(es), 53–54, 54f–55f
- Tonnis osteotomy, for acetabular repositioning, 632–633
- TORCHES infection(s), and cerebral palsy, 1123
- Torode and Zieg classification, of pelvic fractures, 2254–2255, 2255f, 2259f, 2261f
- Toronto brace, for Legg–Calvé–Perthes disease, 695f, 695–696
- Torsionometer, Perdrille, 225, 226f
- Torticollis
acquired, 187–195, 188f–193f
and atlantoaxial rotatory displacement, 187–191, 188f–193f
inflammatory/septic, 193–195
neurogenic, 191–193, 193f
ocular, 194–195
congenital, 171–187, 173f–187f
and Klippel–Feil syndrome, 173–187, 178f–187f. *See also* Klippel–Feil syndrome.
differential diagnosis of, 171–172, 172t
muscular, 171–173, 173f–177f
clinical features of, 171, 173f–174f
etiology of, 171
treatment of, 172–173, 175f–177f
paroxysmal, of infancy, 193
with developmental dysplasia of hip, 517, 517f, 519, 519f
- Torus fracture(s), 2059–2060, 2060f–2061f
- Total contact molding insert(s), 390f–391f, 390–392
- Total joint arthroplasty
for hemophilic arthropathy, 1889
for rheumatoid arthritis, 1821
of hip
for cerebral palsy, 1201
for osteopetrosis, 1553
- Totally implantable lengthening device(s), for limb lengthening, 1094–1095
- Tourniquet, for regional anesthesia, 115
- Tourniquet(s), and sickle cell disease, 1894
- Toxic synovitis, 1823–1825
vs. septic arthritis, 1850
- T-plate, for wrist fusion, 471, 472f
- TR (repetition time), in magnetic resonance imaging, 152, 152t
- Traction
before femoral osteotomy, 697
for acetabular fractures, 2268
for atlantoaxial rotatory displacement, 189
for developmental dysplasia of hip, in child ages 6 months to 2 years, 539–540, 539f–540f
for femoral shaft fractures, 2305, 2307f, 2307–2308
for hemophilic arthropathy, 1887
for Legg–Calvé–Perthes disease, 692–693, 695f
for reduction of hip dislocation, 2275, 2280
for reduction of spondylolisthesis, 366, 367f
for supracondylar humeral fractures, 2156, 2159f
suspension, after hamstring lengthening, 1336, 1337f
with femoral osteotomy, for limb lengthening, 1079, 1079f
- Traction epiphysis, 1045
- “Traction reduction,” for developmental dysplasia of hip, 540
- Traction/countertraction technique, for reduction of glenohumeral dislocation, 2130, 2130f

- Transarticular screw fixation, C1–2, for atlantoaxial rotatory displacement, 191, 192f
- Transfusion(s)
during scoliosis surgery, requirement for, preoperative assessment of, 240
for scoliosis surgery, using Texas Scottish Rite Hospital instrumentation, 246p
minimization of, 116–117
- Transiliac lengthening, for limb lengthening, 1081, 1081f
- Transitional popliteal cyst(s), 830f, 831
- Transphyseal screw(s), in epiphyseal stapling, for leg length inequality, 1063, 1074f
- Transplantation
bone marrow
for Hurler's syndrome, 1575
for osteogenesis imperfecta, 1729
for osteopetrosis, 1553
physeal, for limb lengthening, 1078
umbilical cord blood, for osteopetrosis, 1553
- Trapezius muscle, dissection of, in forequarter amputation, 2002p–2003p
- Trapezius transfer, Saha, for deltoid paralysis, 1406f, 1406t, 1406–1407
- Trauma
ABCs of, 2072–2073
and adolescent tibia vara, 850–851
and Legg-Calvé-Perthes disease, 662–663
and lumbar disk herniation, 371
and pes cavus, 985
multiple. *See* Multiple injury(ies).
- Traumatic amputation, 1790–1792, 1790f–1793f, 1791t. *See also* Amputation, traumatic.
- Treacher Collins syndrome, anesthesia in, 125t
- Trendelenburg gait, 78, 84, 84f
during ambulation with prosthesis, 1801

- Trethowan's sign, in slipped capital femoral epiphysis, 719, 719f
- Trevor's disease, 1946, 1947f–1948f
- Triamcinolone, intra-articular injection, for rheumatoid arthritis, of hand, 474, 474f–475f
- Triceps brachii muscle
anterior transfer of, in poliomyelitis, 1419, 1425f
paralysis of, in poliomyelitis, 1419
strength of, after Steindler flexorplasty, 1408, 1418
- Triceps insufficiency, muscle transfers for, after talipes equinovarus surgery, 946, 947f
- Triceps reflex, 56
- Triceps surae muscle
contractures of, in vertical talus, 964f
function of, 1361
paralysis of
calcaneocavus foot deformity from, 1365, 1378f
in poliomyelitis, 1365–1373, 1373f, 1378f–1379f, 1380p–1385p, 1386f–1387f
unopposed activity with tibialis posterior muscle, in poliomyelitis, 1365, 1372f, 1374p–1377p
- Triceps transfer, for elbow flexion, in arthrogryposis, 1655
- Tricepsplasty, elbow release with, for arthrogryposis, 1654, 1656p–1659p
- Trident hand, in achondroplasia, 1511, 1511f
- Trigger finger, in Hurler's syndrome, 1575, 1577f
- Trigger thumb, 445
- Triphalangeal thumb, treatment of, 431, 431f
- Triplane fracture(s), 2410–2414, 2410f–2417f
closed reduction of, 2411–2412
mechanism of, 2410–2411, 2410f–2411f
open reduction of, 2412, 2414, 2415f–2417f
prognosis in, 2414
radiographic features of, 2411, 2412f–2414f
- Triple arthrodesis. *See* Arthrodesis, triple.
- Triradiate cartilage
anatomy of, 2252f
injury to, in acetabular fractures, 2269–2270, 2270f
- Trisomy 21. *See* Down syndrome.
- Trispiral tomography, of scaphoid fractures, 2247
- Trochanter, greater
avulsion injury of, 2260f
position of, in avascular necrosis, 583
- Trochanteric advancement, lateral, for avascular necrosis, in developmental dysplasia of hip, 610p–611p
- Trochanteric epiphysiodesis
after femoral osteotomy, 697, 700f
for avascular necrosis, in developmental dysplasia of hip, 584, 588p–595p
destruction of growth plate in, 592p–593p
dissection in, 588p–591p
incision for, 588p–589p
postoperative care in, 594p–595p
removal of bone plug in, 590p–591p
greater, for developmental coxa vara, 772–773
- Trochanteric osteotomy, in iliopsoas muscle transfer, 1340–1341p
- Trochanteric transfer, for avascular necrosis, in developmental dysplasia of hip, 584, 598p–611p
dissection in, 598p–603p
incision for, 598p–599p
osteotomy in, 602p–607p
position for, 598p
postoperative care in, 608p
with lateral wedge valgus osteotomy, 584–586, 614p–617p
- Trochlea, fractures of, 2205
- Truncation artifact(s), on magnetic resonance imaging, 155
- Trunk, in poliomyelitis, 1395
- Trunk incurvation reflex, 52, 54f
- TSRH instrumentation. *See* Texas Scottish Rite Hospital (TSRH) instrumentation.

 deficiency.
 classification of, 410t, 410–411
 diagnosis of, 411, 411t
 embryology of, 379–380
 epidermoid inclusion cysts of, 497
 epiphyses of
 closure of growth plates in, age at, 7f
 secondary ossification centers in, age at
 appearance of, 6f
 foreign bodies in, 497
 function of, in myelomeningocele, 1255
 growth of, cerebral palsy and, 1209
 injuries to, 2115–2250. *See also under specific*
site, e.g., Clavicle, injuries to.
 long bones of, growth of, physis
 and, 10f
 manual muscle tests of, 59–61
 microsurgery on, 503–504, 505f–511f, 512.
See also Microsurgery.
 muscles of, innervation of, 47t
 physical examination of, 380
 prostheses for, 1800–1801
 pseudoaneurysms of, 497, 1796–1798
 regional anesthesia for, 115–116
 surgical procedures on
 goals of, 379
 timing of, 380–382, 381t–384t, 383f
 tumors of, 487, 496–497, 502–503
 imaging studies of, 496
 neoplastic, 502–503
 non-neoplastic, 496–497, 502–503
 vascular malformations of, 497, 502
 weakness of, in Charcot-Marie-Tooth
 disease, 1441, 1444, 1447f
- Upper respiratory infection(s), and anesthesia,
 110
- Urinalysis, of glycosaminoglycans, in
 mucopolysaccharidosis, 1572
- Urologic disorder(s), from myelomeningocele,
 1258–1259
- Uveitis, in rheumatoid arthritis, 1816
- V radiolucency, in coxa vara, 766, 766f
- Vaccination, for tetanus, 2075
- Vaccine-associated paralytic poliomyelitis
 (VAPP), 1321
- VACTERL association, 1754
- Valgus deformity, 25
 from traction, for developmental dysplasia of
 hip, 583, 583f
 of foot. *See* Pes valgus.
- Valgus osteotomy
 closing wedge, of proximal femur, with
 distal-lateral advancement of greater
 trochanter, 614p–617p
 for angular deformities of leg, 1107, 1110f
 for developmental coxa vara, 772–773,
 774f–775f
 for hip fractures, 2296, 2298f–2299f
 for Legg-Calvé-Perthes disease, 699–700
 of proximal femur, for nonreconstructable
 hip in cerebral palsy, 1201, 1208f
- Valgus overcorrection, from treatment of
 talipes equinovarus, 942–943, 943f–944f
- van Ness rotationplasty, for proximal focal
 femoral deficiency, 1763, 1768f–1769f
- VAPP (vaccine-associated paralytic
 poliomyelitis), 1321
- Varicosities, in Klippel-Trénaunay syndrome,
 1671
- Varization osteotomy, for paralytic dislocation
 of hip, in poliomyelitis, 1349–1350,
 1352p–1355p
- Varus deformity, 25
 from treatment of developmental dysplasia
 of hip, 583, 585f–586f
 of ankle, after fractures, 2405, 2406f
 of tibia, with Blount's disease, 1104f, 1107,
 1109f
- Varus femoral osteotomy, for Legg-Calvé-
 Perthes disease, 696–698, 699f–700f
- Varus fifth toe, 1024, 1027f–1029f,
 1030p–1031p, 1032
 clinical features of, 1024, 1027f
 treatment of
 Butler procedure in, 1024, 1028f–1029f
 McFarland operation in, 1024,
 1030p–1031p
- Varus osteotomy
 closing wedge, for ankle valgus, in hereditary
 multiple exostosis, 1924, 1925f
 with tendon transfer, for subluxation/
 dislocation of hip, in myelomeningocele,
 1274
- Vascular fibrous tissue, of bone marrow space,
 in Caffey's disease, 1562, 1562f
- Vascular injury(ies), 2078f, 2078–2079
 from elbow dislocation, 2193
 from femoral shaft fractures, 2319–2320
 from open tibial fractures, 2383
 from supracondylar humeral fractures,
 2163–2165
- Vascular malformation(s)
 diagnosis of, magnetic resonance imaging in,
 157f
 of upper extremities, 497, 502
- Vascular system
 anatomy of, and osteomyelitis, 1841–1842,
 1843f
 injuries to, with pelvic fractures, 2256
- Vascularized fibular graft, for congenital
 anterolateral tibial bowing, 877–878,
 878f
- Vastus lateralis muscle, dissection of
 in intertrochanteric varus osteotomy, and
 internal fixation with blade plate,
 572p–573p
 in trochanteric epiphysiodesis, 588p–589p,
 594p–595p
 in trochanteric transfer, for avascular
 necrosis, 600p–601p
- Vastus medialis obliquus (VMO) ligament,
 tears of, 2351–2352
- VATER association, 1752, 1754
- VATS (video-assisted thoracoscopic surgery)
 for idiopathic scoliosis, 240
 for Scheuermann's kyphosis, 333–334
- Vaulting, during ambulation with prosthesis,
 1802
- VDRO (femoral varus derotation osteotomy),
 for hip subluxation/dislocation, in cerebral
 palsy, 1189, 1194, 1194f
- Vena cava, protection of, in anterior
 instrumentation, for idiopathic scoliosis,
 268p–269p, 271p
- Venous malformation(s), diagnosis of,
 magnetic resonance imaging in, 157f
- Ventriculoperitoneal shunting, in
 myelomeningocele, 1257
- Verbal skill(s), developmental milestones for,
 21, 21t
- Verebelyi-Ogston procedure, 1653–1654
- Verrucous hyperplasia, in neurofibromatosis,
 1625
- Vertebra(e)
 abscesses of, in tuberculous spondylitis,
 1832–1833, 1833f
 block, and congenital scoliosis, 284, 284f,
 288f
 destruction of, in tuberculous spondylitis,
 1831–1832, 1832f–1835f
 displacement of, congenital, 297, 298f
 formation of, defects of
 and congenital kyphosis, 291, 293f,
 294–295, 295f–298f
 and congenital scoliosis, 283–284,
 283f–284f
 growth of, 239, 240f
 in sickle cell disease, 1893f, 1893–1894
 of cervical spine
 anomalies of, in Klippel-Feil syndrome,
 174–176
 range of motion of, 34t
 pathology of, in myelomeningocele, 1252
 rotation of, in scoliosis, measurement of,
 225–226, 226f–227f
 scalloping of, in neurofibromatosis, 301,
 303f–304f
 segmentation of
 defects of, and congenital scoliosis,
 283–285, 284f–286f
 failure of, and congenital kyphosis, 291,
 294f, 295, 297
- Vertebra plana, in eosinophilic granuloma,
 1939, 1940f
- Vertebral apophysis, slipped, 99, 374–375
- Vertebral body(ies)
 and neural arches, synchondrosis between,
 130f
 beaking of
 in Hurler's syndrome, 1575, 1576f
 in Morquio syndrome, 1578f, 1579
 shape of, in idiopathic scoliosis, 219–220,
 220f
 trapezoid-shaped, in Scheuermann's
 kyphosis, 324, 327f
- Vertebral end plate(s), removal of, in anterior
 instrumentation, for idiopathic scoliosis,
 270p–271p
- Vertebral osteomyelitis
 and torticollis, 193–194
 back pain in, 103
 vs. diskitis, 87–88
- Vertebrectomy, Dunn-McCarthy technique of,
 for kyphosis, in myelomeningocele, 1280,
 1282p–1287p
- Vertex presentation, and neonatal position, 38f

- Vertical suspension positioning reflex, 49
 Vertical talus. *See* Talus, vertical.
- Vickers' ligament
 in Madelung's deformity, 416–417, 417f
 release of, with dome osteotomy, for
 Madelung's deformity, 419–420, 420f
- Video-assisted thoracoscopic surgery (VATS)
 for idiopathic scoliosis, 240
 for Scheuermann's kyphosis, 333–334
- Villonodular synovitis, pigmented, 1944–1946,
 1946f–1947f
- Viral osteomyelitis, 1870–1871
- Visual analog scale(s), for assessment of pain,
 112, 112f
- Vitallium staple(s), for epiphyseal stapling, for
 leg length inequality, 1074f
- Vitamin B₆, for homocystinuria, 1597
- Vitamin C, deficiency of, and scurvy,
 1705–1707, 1706f
- Vitamin D
 and calcium metabolism, 1685, 1686f
 deficiency of
 and rickets, 1686. *See also* Rickets.
 radiography in, 129, 129f
 for renal osteodystrophy, 1698
 for rickets, 1689
- Vocational rehabilitation, for
 myelomeningocele patient, 1296
- Volar fasciotomy, of forearm, 2078f
- Volkman's ischemic contracture
 from Monteggia fractures, 2225
 in hemophilia, 1883, 1883f
 of forearm, 408, 409f–410f, 410
 from casting of supracondylar humeral
 fractures, 2156, 2165
- von Recklinghausen's disease, 451. *See also*
 Neurofibromatosis, type 1.
- Von Rosen splint, for developmental dysplasia
 of hip, 538f
- Von Rosen view, in developmental dysplasia of
 hip, 531
- von Willebrand's disease, 1879
- V-osteotomy, Japas tarsal, for pes cavus, 999,
 1006p–1009p
- Vulpius procedure, for Achilles tendon
 lengthening, 1136, 1137f–1138f
- Waddell's triad, 2302
- Wagner apparatus, for limb lengthening, 1079,
 1080f, 1091–1092
- Wagner's intertrochanteric double osteotomy,
 for avascular necrosis, 612p–613p. *See also*
 Intertrochanteric osteotomy.
- Wake-up test, 241
- Waldenström classification, of Legg-Calvé-
 Perthes disease, 673, 673t
 for radiographic staging, 22f–23f, 675t
- Walking. *See also* Ambulation.
 energy for, 76–77, 77t
 velocity of, 76
- Walking reflex, 49, 51, 53f
- Walton classification, of muscular dystrophy,
 1463, 1465t
- Warner's syndrome, 1782
- Wart(s), of hand, 479
- Watson-Jones approach, to bone graft
 epiphysiodesis, for slipped capital femoral
 epiphysis, 731, 732p–733p
- Watson-Jones classification, of tibial tuberosity
 fractures, Ogden modification of, 2342f
- WBC (white blood cell) count, in acute
 hematogenous osteomyelitis, 1846
- “Web creep,” after treatment of syndactyly, 444
- Weber forceps, for reduction of triplane
 fractures, 2414, 2415f–2416f
- Wedge osteotomy
 for congenital scoliosis, 291, 292f
 Irwin, for genu recurvatum, in poliomyelitis,
 1359, 1360f
- Weight, in relation to age, 10, 13f–18f
 for boys, 10, 13f, 15f, 17f
 for girls, 10, 14f, 16f, 18f
- Welander's syndrome, anesthesia in, 125t
- Werdnig-Hoffmann disease, 1311, 1312f
 anesthesia in, 125t
- Wheelchair(s), for myelomeningocele patient,
 1295
- “Wheeled stander,” 1291, 1292f
- Whip, during ambulation with prosthesis, 1803
- “Whistling face” syndrome, 1662, 1663f
- White and Stubbins technique, of
 epiphysiodesis, for leg length inequality,
 1061–1062, 1062f
- White blood cell (WBC) count, in acute
 hematogenous osteomyelitis, 1846
- Whitesides needle technique, of
 intercompartmental pressure
 measurement, 2076, 2077f
- Whitlow, herpetic, 477, 477f
- Wiesel-Rothman technique, for measurement
 of occipito-atlantal instability, 1618, 1619f
- Wilberg's center-edge angle, in developmental
 dysplasia of hip, 531, 532f
- Williams rod, for fixation of congenital
 anterolateral tibial bowing, 874, 874f–875f,
 877f
- Wilmington brace, for scoliosis, idiopathic,
 230–231
- Wilms' tumor, with Beckwith-Wiedemann
 syndrome, 1040
- Wilson shelf procedure, 647f–648f
- Wilson's sign, 790
- Wiltse muscle-splitting technique, for
 spondylolisthesis, 362, 362f
- Wiltse technique, for congenital fibular
 pseudarthrosis, 886f, 887
- Winberger's sign, in scurvy, 1706, 1706f
- Wisconsin instrumentation, segmental spinal,
 for idiopathic scoliosis, 242, 242f,
 244p–245p
- Withdrawal reflex, 51
- Wolff-Parkinson-White syndrome, anesthesia
 in, 125t
- Wolf's law, 2059
- Wong-Baker Faces Rating Scale, 112, 112f
- Word-graphic rating scale(s), for pain
 assessment, 112f
- Wormian bone(s), in osteogenesis imperfecta,
 1725–1726, 1727f
- Wound(s)
 from animal bites, 478
 from lawnmower injuries, care of, 2434
 from open fractures, care of, 2073, 2382,
 2382f
 gunshot, 2075
 infection of, from instrumentation for
 scoliosis, 258, 1228
 on hand, closure of, 384–385, 385f
 puncture
 infection from, 1863
 of foot, 2434
- Woven bone
 in Campanacci's disease, 1915, 1917f
 in fibrous dysplasia, 1911, 1913f
- Wrap-around artifact(s), on magnetic
 resonance imaging, 155
- Wrisberg ligament discoid lateral meniscus,
 814, 814f
- Wrist
 deformities of, from brachial plexus palsy,
 481, 483, 484f
 flexor tendons of, fractional lengthening of,
 1216p–1219p
 fracture of, and physal arrest, 2068f
 fracture-dislocations of, 2248–2249
 fusion of, for synovitis, 471, 472f
 in arthrogyrosis, 1655
 in cerebral palsy, surgical procedures on,
 1211, 1212p–1219p
 in rheumatoid arthritis, 1817, 1817f
 splints for, 394, 395f–397f, 396
 synovitis of, 469, 469f
 treatment of, 470–472, 470f–472f
 exercise in, 470
 tenosynovitis of, 469–470
 treatment of, 470–472, 470f–472f
 intra-articular corticosteroid injections
 in, 470, 470f–471f
 operative, 470–472, 472f
 ulnar deficiency in, treatment of, 413
- Wrist sign, in Marfan's syndrome, 1587, 1587f
- Wry neck, 171–173, 173f–177f
- Wynne-Davies criteria, for ligamentous laxity,
 515, 515f
- Xp21, and Duchenne muscular dystrophy, 1463
- X-ray equipment, 133–134, 134f
- Y-ligament of Bigelow, anatomy of, 2273, 2273f
- Y-osteotomy, Pauwels' intertrochanteric, for
 developmental coxa vara, 773, 774f, 775,
 776p–779p
- Young and Burgess classification, of pelvic
 fractures, 2252, 2253f
- Yount's fasciotomy, for iliotibial band
 contractures, in poliomyelitis, 1331, 1337f
- “Y-scapular” view, in proximal humeral
 physal fractures, 2125, 2126f
- Zancolli procedure, for brachial plexus palsy,
 with elbow deformities, 487, 498p–501p
- Z-foot, for pes planovalgus, 921f, 921–922
- Ziehl-Neelsen stain, in tuberculous
 osteomyelitis, 1866, 1867f
- Zielke derotation spondylodesis
 instrumentation, for idiopathic scoliosis,
 259–260, 260f
- Zone of polarizing activity, and upper
 extremity development, 379
- Zone of polarizing activity (ZPA), in limb
 development, 1745, 1746f, 1747
- Zone of Ranvier, 2060
- ZPA (zone of polarizing activity), in limb
 development, 1745, 1746f, 1747
- Z-plasty, for congenital muscular torticollis,
 172–173, 176f–177f
